SUBJECT INDEX

Volumes 21–30

Analytical microscopy

Non-zeroth-order Laue zone effects and ALCHEMI, *Lynch and Rossouw* 21 (1987) 69
Measurement of local thickness by electron energy-loss spectroscopy, *Egerton and Cheng* 21 (1987) 231
Simplification of X-ray absorption correction in thin-sample quantitative microanalysis, *Horita, Sano and Nemoto* 21 (1987) 271
Localization and ALCHEMI for zone axis orientations, *Rossouw and Maslen* 21 (1987) 277
Localization distance of plasmons excited by high-energy electrons, *Cheng* 21 (1987) 291
Determination of manganese oxidation states in solids by electron energy-loss spectroscopy, *Rask, Miner and Buseck* 21 (1987) 321
Nanosecond-exposure electron microscopy of laser-induced phase transformations, *Bostanjoglo, Tornow and Tornow* 21 (1987) 367
New examples for near-edge fine structures in electron energy loss spectroscopy, *Hofer and Golob* 21 (1987) 379
Frontiers of Electron Microscopy in Materials Science, *Eds. Bradley and King* 22 (1987) vii
Local bonding and electronic structure obtained from electron energy loss scattering, *Batson, Kavanagh, Wong and Woodall* 22 (1987) 89
Parallel detection electron spectrometer using quadrupole lenses, *Krivanek, Ahn and Keeney* 22 (1987) 103
CCD-based parallel detection system for electron energy-loss spectroscopy and imaging, *Strauss, Naday, Sherman and Zaluzec* 22 (1987) 117
EELS as a probe of d-band occupancy in magnetic alloys, *Morrison, Brodsky and Zaluzek* 22 (1987) 125
Analytical electron microscopy of a sulfur-poisoned palladium catalyst with a dedicated STEM, *Lyman, Stenger and Michael* 22 (1987) 129
High resolution electron microscopy and microanalysis of carbon-supported hydrodesulfurization catalysts, *Allard, Brinen, Daly and Garratt-Reed* 22 (1987) 135
Characterization of model Pt–Rh automotive exhaust control catalysts by EXAFS, STEM and XRD, *Robota, Broach, Sachtler and Bradley* 22 (1987) 149
STEM studies of ruthenium dispersed on a pillared clay Fischer–Tropsch catalyst, *Rightor and Pinnavaia* 22 (1987) 159
An experimental X-ray detector efficiency function determined using pure submicron spheres: an approach to quantification, *Kelly* 22 (1987) 175
Uncertainty analysis for low P:B XEDS measurements – variation of aluminum in silicon nitride, *Bonnell and Bischoff* 22 (1987) 191
Microstructural analysis of in-situ Cu–Nb composite wires, *Pelton, Laabs, Spitzig and Cheng* 22 (1987) 251
Characterization of ion-implanted silicon: correlation of optical measurements with microstructural observations, *Donlon, James, Bomback, Huo and Wang* 22 (1987) 305
Size and shape dependence of the surface plasmon frequencies for supported metal particle systems, *Wang and Cowley* 23 (1987) 97
Transmission electron microscopy study of the reaction of Sn_9^{4-} Zintl ions with single crystal Au films, *Treacy, Haushalter and Rice* 23 (1987) 135
The determination of site occupancies in garnet by planar and axial ALCHEMI, *Otten and Buseck* 23 (1987) 151
When is parallel illumination best for ALCHEMI? *Krishnan* 23 (1987) 199
Foreword to Chemical Reactions and the Electron Microscope, ASU Workshop, January 1987, *Eds. Smith and Barry* 23 (1987) 259
Laser photochemical reactions, *Ehrlich, Rothschild and Black* 23 (1987) 283
The electron-beam-induced reduction of transition metal oxide surfaces to metallic lower oxides, *Smith, McCartney and Burzill* 23 (1987) 299
Phase transformations as studied by electron microscopy, *Van Landuyt, Van Tendeloo and Amelinckx* 23 (1987) 371
Structural transitions in ionic conductors and optical materials, *Davies and Garzon* 23 (1987) 397
Crystallization, resistivity and microstructure of co-deposited metal–silicon thin film alloys, *Smith, Tu and Weiss* 23 (1987) 405
Structural transformation and chemical reduction of $Pr_{24}O_{44}$ induced by the elec-

tron beam during microscopical examination, *Schweda, Eyring and Smith* 23 (1987) 443
Electron-induced decomposition of rubidium chromium fluoride, *Sharma, Barry and Eyring* 23 (1987) 453
Lower limit of detectability at high spatial resolution of As implanted into Si using the JEOL 200CX in the STEM–EDX mode, *Renteln and Ast* 24 (1988) 37
Scanning electron beam submicron analytical techniques, *Buonaquisti and Russell* 24 (1988) 87
Aspects of high resolution imaging with a scanning ion microscope, *Levi-Setti, Chabala and Wang* 24 (1988) 97
Sputter redeposition as a limit to spatially three-dimensional SIMS microanalysis, *Rüdenauer and Steiger* 24 (1988) 115
Atomic site and species determinations using channeling and related effects in analytical electron microscopy, *Krishnan* 24 (1988) 125
Microdiffraction's contribution to microcharacterization, *Eades* 24 (1988) 143
Field electron emission, the atom probe and scanning tunneling spectroscopy, *Hren and Shedd* 24 (1988) 169
Capabilities and limitations of probe methods for the microanalysis of chemical elements in biology: a brief introduction, *Hall* 24 (1988) 181
Frontiers in electron probe microanalysis: application to cell physiology, *LeFurgey, Bond and Ingram* 24 (1988) 185
High spatial resolution spectroscopy in the elemental microanalysis and imaging of biological systems, *Johnson, Izutsu, Cantino and Wong* 24 (1988) 221
Quantitative X-ray mapping of biological cryosections, *Fiori, Leapman, Swyt and Andrews* 24 (1988) 237
Quantitative electron energy loss spectroscopy in biology, *Leapman and Ornberg* 24 (1988) 251
Biological microanalysis by secondary ion mass spectrometry: status and prospects, *Burns* 24 (1988) 269
Proton microscopy and microanalysis – biological applications, *Legge, O'Brien, Kirby and Allan* 24 (1988) 283
Photoelectron imaging and photoelectron labeling, *Griffith and Rempfer* 24 (1988) 299
X-ray fluorescence with synchrotron radiation, *Jones, Gordon, Hanson, Kwiatek and Pounds* 24 (1988) 313
Unbiased method for signal estimation in electron energy loss spectroscopy, concentration measurements and detection limits in quantitative microanalysis: methods and programs, *Trebbia* 24 (1988) 399
Measurement of strain in silver halide particles by convergent-beam electron diffraction, *Vincent, Preston and King* 24 (1988) 409
Direct structure determination of the octacyanophthalocyanine–potassium complex crystal by HREM image simulation, *Yanagi, Maeda, Ueda and Ashida* 25 (1988) 1
Three-dimensional matching of macromolecular structures obtained from electron microscopy; an application to the 70S and 50S *E. coli* ribosomal particles, *Carazo and Frank* 25 (1988) 13
Solid state effects on core electron cross-sections used in microanalysis, *Weng and Rez* 25 (1988) 345
Zone-axis critical voltages and large-angle electron diffraction at 200–400 kV, *Steeds* 26 (1988) 1
CBED and CBIM from semiconductors and superconductors, *Humphreys, Eaglesham, Maher and Fraser* 26 (1988) 13
Determination of structure factor phase invariants from non-systematic many-beam effects in convergent-beam patterns, *Høier, Zuo, Marthinsen and Spence* 26 (1988) 25
Determination of the symmetry of charge-density-wave modulations in $TaTe_4$ by HREM, *Corbett, Hiltz, Boswell, Bennett and Prodan* 26 (1988) 43
On the use of convergent-beam electron diffraction for identification of antiphase boundaries in GaAs grown on Si, *Lilienthal-Weber, Weber, Parechanian-Allen and Washburn* 26 (1988) 59
Earth science applications of ALCHEMI, *Smyth and McCormick* 26 (1988) 77
Electron channeling analysis of aluminium and xenon-implanted aluminium, *Rossouw, Potter and Glanvill* 26 (1988) 87
Microcrystallography using electron channeling: structure factor phase information and crystal site determination, *Taftø and Gjønnes* 26 (1988) 97
Localization effects on quantification in axial and planar ALCHEMI, *Spence, Kuwabara and Kim* 26 (1988) 103
An efficient analytical method for calculating the angular and energy distribution of electrons which have undergone plural scattering in amorphous materials, *Johnson and Isaacson* 26 (1988) 271
The characterization of structural variations within a crystal field, *Frank, Chiu and Degn* 26 (1988) 345
The contribution of inelastically scattered electrons to high resolution images of (Al,Ga)As/GaAs heterostructures, *Boothroyd and Stobbs* 26 (1988) 361
Numerical evaluation of lattice parameters

from high-order Laue zone lines in convergent-beam electron diffraction disks, *De Blasi, Di Giulio and Manno* 26 (1988) 377
Mass-thickness determination by Bethe-sum-rule normalization of the electron energy-loss spectrum, *Crozier and Egerton* 27 (1989) 9
A theoretical analysis of HREM imaging for ⟨110⟩ tetrahedral semiconductors, *Glaisher, Spargo and Smith* 27 (1989) 19
A systematic analysis of HREM imaging of elemental semiconductors, *Glaisher, Spargo and Smith* 27 (1989) 35
Scattering and back-scattering of 1 MeV electrons, *Valle, Genty, Marraud and Pardo* 27 (1989) 67
A systematic analysis of HREM imaging of wurtzite semiconductors, *Glaisher, Spargo and Smith* 27 (1989) 117
A systematic analysis of HREM imaging of sphalerite semiconductors, *Glaisher, Spargo and Smith* 27 (1989) 131
Absorption edge imaging of bacterial endospores with synchrotron radiation, *Panessa-Warren, Tortora and Warren* 27 (1989) 151
Fingerprint of oxygen vacancies in Gd superconductors, *Shibahara, Zhang and Marks* 27 (1989) 185
The resolution of photoelectron microscope with UV, X-ray, and synchrotron excitation sources, *Rempfer and Griffith* 27 (1989) 273
CLEDX: a stand-alone program for quantitative X-ray analysis using the Cliff–Morimer procedure, *Trebbia* 27 (1989) 343
Stardust in the TEM, *Fraundorf, Fraundorf, Bernatowicz, Lewis and Tang* 27 (1989) 401
The dielectric description of inelastic electron scattering, *Schattschneider* 28 (1989) 1
Inner-shell spectroscopy, an atomic view, *Rez* 28 (1989) 16
Cross sections for inelastic electron scattering in solids, *Powell* 28 (1989) 24
High resolution energy-loss spectroscopy, *Batson* 28 (1989) 32
Dielectric theory of localised valence energy loss spectroscopy, *Walls and Howie* 28 (1989) 40
Coherence effects in plasmon excitation, *Schattschneider and Su* 28 (1989) 47
Quantification of white lines in electron energy loss spectroscopy (EELS), *Manoubi, Tencé and Colliex* 28 (1989) 49
Current problems in X-ray emission spectroscopy, *Goldstein, Williams and Lyman* 28 (1989) 56
Study and applications of channeled-electron-induced localized X-ray emission, *Glas* 28 (1989) 61
Local structural investigation of surfaces and interface by EELFS and EXAFS, *De Crescenzi* 28 (1989) 65
Problems in X-ray emission spectroscopy (summary), *Chapman* 28 (1989) 76
The evolution of the analytical electron microscope, *Van der Mast* 28 (1989) 81
Electron detection in the analytical electron microscope, *Chapman, Craven and Scott* 28 (1989) 108
The wavelength-dispersive spectrometer and its proposed use in the analytical electron microscope, *Goldstein, Lyman and Williams* 28 (1989) 162
Electron-energy-loss-based spectroscopies: a molecular viewpoint, *Hitchcock* 28 (1989) 165
Optimization of imaging energy filters for high-resolution analytical electron microscopy, *Rose* 28 (1989) 184
Spectroscopy techniques (summary), *Krivanek* 28 (1989) 213
Quantitative analysis of electron-energy-loss spectra, *Egerton* 28 (1989) 215
Processing and quantification of X-ray energy-dispersive spectra in the analytical electron microscope, *Zaluzec* 28 (1989) 226
Chemical mapping and multivariate statistical analysis (prospect), *Bonnet and Hannequin* 28 (1989) 248
On the effect of objective lens chromatic aberration on quantitative electron-energy-loss spectroscopy (EELS), *Titchmarsh and Malis* 28 (1989) 277
Evaluation of errors and accuracy of quantitative measurements (summary), *Craven* 28 (1989) 292
Analytical microscopy problems specific to highly divided solids, *Gallezot and Leclercq* 28 (1989) 308
Limits of detection sensitivity due to electron beam radiation damage, *Isaacson* 28 (1989) 320
Atomic sputtering in the analytical electron microscope, *Bradley and Zaluzec* 28 (1989) 335
Elemental analysis near the single-atom detection level by processing sequences of energy-filtered images, *Mory and Colliex* 28 (1989) 339
Definition of ultimate attainable spatial resolution (summary), *Scheinfein* 28 (1989) 359
The determination of the structure and composition at interfaces to atomic resolution, *Boothroyd, Baxter, Bithell, Hÿtch, Ross, Sato and Stobbs* 29 (1989) 18
Frontiers of analytical electron microscopy with special reference to cluster and interface problems, *Colliex, Maurice and Ugarte* 29 (1989) 31
Material transport mechanisms during the diffusion bonding of niobium to Al_2O_3, *Burger und Rühle* 29 (1989) 88
Characterization of freeze-dried alumina powders using electron microscopy, *Lloyd, Blachere, Beyer, Kalnas and Mairet* 29 (1989) 153
Decomposition of refractory carbides in the analytical electron microscope, *Medlin, Thomas and Howitt* 29 (1989) 228

Characterization of ceramic films and interfaces by electron microscopic and spectroscopic techniques, *Erdemir and Cheng* 29 (1989) 266
Analysis of precipitation in cast alloy 718, *Muralidharan, Thompson and Walck* 29 (1989) 277
Radiation damage and copper distribution in 14 MeV copper-ion-implanted nickel – TEM and AEM analyses in cross-section, *Wang, Dodd and Kulcinski* 29 (1989) 284
Studies of interfacial segregation in the analytical electron microscope: a brief review, *Williams and Romig, Jr.* 30 (1989) 38
Z-contrast STEM for materials science, *Pennycook* 30 (1989) 58
The use of the transmission electron microscope in analyzing slip propagation cross interfaces, *Clark, Wise, Shen and Wagoner* 30 (1989) 76
Electron microscopy of phase transformations in spinodal and ordered alloys, *Bentley* 30 (1989) 157

Conventional electron microscopy

Defects in a lamellar polymer by high resolution electron microscopy, *Giorgio and Kern* 21 (1987) 157
Associations between polymer membranes and globular molecules, *Giorgio and Kern* 21 (1987) 251
Transmission electron microscopy study of the reaction of Sn_9^{4-} Zintl ions with single crystal Au films, *Treacy, Haushalter and Rice* 23 (1987) 135
Microstructural evolution during the decomposition of $Mg(OH)_2$, *Dahmen, Kim and Searcy* 23 (1987) 365
Transmission electron diffraction and microscopy of condensed sulphur hexafluoride, *Raynerd and Venables* 23 (1987) 433
Microtomography from limited projections in conventional TEM for 3D reconstruction of an intact cell, *Nelson and Hobbib* 25 (1988) 293
Validity of the kinematical approximation in transmission electron diffraction for the analysis of surface structures, *Tanishiro and Takayanagi* 27 (1989) 1
A theoretical analysis of HREM imaging for ⟨110⟩ tetrahedral semiconductors, *Glaisher, Spargo and Smith* 27 (1989) 19
A systematic analysis of HREM imaging of elemental semiconductors, *Glaisher, Spargo and Smith* 27 (1989) 35
Computer image analysis of two-dimensional crystals of beef heart NADH: ubiquinone oxidoreductase fragments. I. Comparison of crystal structures in various negative stains, *Brink, Van Breemen, Keegstra and Van Bruggen* 27 (1989) 79
Computer image analysis of two dimensional crystals of beef heart NADH: ubiquinone oxidoreductase fragments. II. Comparison of frozen hydrated and negatively stained specimens, *Brink, Booy and Van Bruggen* 27 (1989) 91
Effects of certain electron-microscope stains on phospholipid monolayers, *Gorwyn and Barnes* 27 (1989) 113
Charging effect on the HRTEM imaging of small MgO crystals, *Tanji, Masaoka, Ito, Yada and Cowley* 27 (1989) 223
Computer image analysis of two-dimensional crystals of beef heart NADH: uniquinone oxidoreductase fragments. I. Comparison of crystal structures in various negative stains (E), *Brink, Van Breemen, Keegstra and Van Bruggen* 27 (1989) 334
Electron microscopy of $Bi_2Sr_2Ca_nCu_{1+n}O_{6+2n}$ and $Tl_2Ba_2Ca_nCu_{1+n}O_{6+2n}$ superconductors, *Van Tendeloo, Zandbergen, Van Landuyt and Amelinckx* 29 (1989) 115
Application of transmission electron microscopy to the observation of dislocation emission from crack tips at elevated temperatures, *Clarke and Chiao* 29 (1989) 203
TEM and in-situ EM study of the dispersion of MoO_3 on SiO_2, *Datta, Regalbuto and Allen* 29 (1989) 233
Radiation damage and copper distribution in 14 MeV copper-ion-implanted nickel – TEM and AEM analyses in cross-section, *Wang, Dodd and Kulcinski* 29 (1989) 284
Transmission electron microscopy characterization of precipitates, *Dahmen* 30 (1989) 102
Scanning tunneling and transmission electron microscopy on identical areas of biological specimens, *Stemmer, Hefti, Aebi and Engel* 30 (1989) 263
Interferometric measurement of axial coma in electron-microscopical images, *Zemlin* 30 (1989) 311

Cross-sections

K, L, M, N, O and P ionization cross-sections for electron energy loss spectroscopy, *Skiff, Carpenter, Lin and Higgs* 25 (1988) 47
Solid state effects on core electron cross-sections used in microanalysis, *Weng and Rez* 25 (1988) 345
The dielectric description of inelastic electron scattering, *Schattschneider* 28 (1989) 1
Inner-shell spectroscopy: an atomic view, *Rez* 28 (1989) 16
Cross sections for inelastic electron scattering in solids, *Powell* 28 (1989) 24
Theoretical analysis of inelastic electron scattering (summary), *Sevely* 28 (1989) 72
A comparison of theoretical and experimental L and M cross sections, *Auerhammer, Rez and Hofer* 30 (1989) 365

Cryomicroscopy

High resolution cryo system designed for JEM 100CX electron microscope, *Jeng and Chiu* 23 (1987) 61
Quantitative X-ray mapping of biological cryosections, *Fiori, Leapman, Swyt and Andrews* 24 (1988) 237
Substrate properties affect the mass loss rate in collodion at liquid helium temperature, *Lamvik, Davilla and Klatt* 27 (1989) 241
In-situ HVEM study of migration of bcc/glass interfaces in $TiCr_2$, induced by 1 MeV krypton irradiation at 80–180 K, *Allen and Rehn* 30 (1989) 188
Magnification calibration and the determination of spherical virus diameters using cryo-microscopy, *Olson and Baker* 30 (1989) 281

Detectors, photographic and other

Skew thoughts on parallelism, *Christenson and Eades* 26 (1988) 113
Channeling effects from impurity atoms in the high-angle annular detector of the STEM, *Treacy, Gibson, Short and Rice* 26 (1988) 133
Electron detection in the analytical electron microscope, *Chapman, Craven and Scott* 28 (1989) 108
Improved parallel-detection electron-energy-loss spectrometer, *Krivanek* 28 (1989) 118
Parallel recording for an electron spectrometer on a scanning transmission electron microscope, *Berger and McMullan* 28 (1989) 122
A quadrupole lens system for use in a parallel recording system for electron energy loss spectroscopy, *Scott and Craven* 28 (1989) 126
Two-dimensional CCD arrays as parallel detectors in electron-energy-loss and X-ray wavelength-dispersive spectroscopy, *Zaluzec and Strauss* 28 (1989) 131
X-ray detectors and spectrometers, *Lyman, Williams and Goldstein* 28 (1989) 137
Problems associated with EDX detectors from a manufacturer's point of view, *Lowe* 28 (1989) 150
The effect of magnetic fields on incomplete charge collection in Si(Li) X-ray detectors, *Craven, McHardy and Pears* 28 (1989) 157
A corrected double-deflection electron spectrometer equipped with a parallel recording system, *Haider* 28 (1989) 190
One- and two-dimensional electron detectors (summary), *Eades* 28 (1989) 209
X-ray detectors (summary), *Bentley* 28 (1989) 211

Diffraction and optical diffraction

The analysis and application of dynamical effects in HOLZ patterns, *Britton and Stobbs* 21 (1987) 1
Non-zeroth-order Laue zone effects and ALCHEMI, *Lynch and Rossouw* 21 (1987) 69
Observation of dynamic extinction due to a glide plane perpendicular to an incident beam by convergent-beam electron diffraction, *Tanaka, Terauchi and Sekii* 21 (1987) 245
Convergent-beam electron diffraction from GaAs/AlAs superlattices, *Gat and Schapink* 21 (1987) 389
Influence of segregation on the diffraction effects from homophase interfaces, *Vitek* 22 (1987) 197
SREM of MgO crystal surface structure and in-situ-deposited metallic particles on MgO surface, *Ou and Cowley* 22 (1987) 207
Experimental studies of atomic step contrast in reflection electron microscopy (REM), *Hsu and Peng* 22 (1987) 217
Determining the 3D lattice parameters of nanometer-sized single crystals from images, *Fraundorf* 22 (1987) 225
Weak-beam α-fringe electron microscopy of interface structures, *Miyazawa and Ishida* 22 (1987) 231
Solidification structure and primary Al–Fe–Si particles in direct-chilled-cast aluminium alloys, *Skjerpe, Gjønnes and Langsrud* 22 (1987) 239
Microstructural analysis of in-situ Cu–Nb composite wires, *Pelton, Laabs, Spitzig and Cheng* 22 (1987) 251
Precipitation and phase stability of solid Kr in cavities after room-temperature implantation of Al, *Birtcher and Jäger* 22 (1987) 267
EDS investigation of solute–precipitate interactions in ferritic steels under irradiation, *Muroga, Yoshida and Kitajima* 22 (1987) 281
Scale structures during oxidation and sulphidation of nickel and a nickel–chromium alloy, *Gjønnes and Andersen* 22 (1987) 289
Electron microscopy study of sputtered NbN films, *Ho, Kampwirth, Gray, Capone, Chumbley and Meshii* 22 (1987) 297
Characterization of ion implanted silicon: correlation of optical measurements with microstructural observations, *Donlon, James, Bomback, Huo and Wang* 22 (1987) 305
Temperature variation of indentation damage in (100) GaAs single crystals, *Lee, Scott and Danyluk* 22 (1987) 319
On the phase-object function, used in dynamical electron diffraction calculations, *De Jong, Coene and Van Dyck* 23 (1987) 3
Electron resonance channeling on crystal surfaces in reflection high energy electron diffraction geometry, *Wang, Lu and Cowley* 23 (1987) 205
Phase transformation as studied by electron microscopy, *Van Landuyt, Van Tendeloo and Amelinckx* 23 (1987) 371

Transmission electron diffraction and microscopy of condensed sulphur hexafluoride, *Raynerd and Venables* 23 (1987) 433
Atomic site and species determinations using channeling and related effects in analytical electron microscopy, *Krishnan* 24 (1988) 125
Microdiffraction's contribution to microcharacterization, *Eades* 24 (1988) 143
Structure and microstructure in $Ba_2YCu_3O_{7-x}$, *Moodie and Whitfield* 24 (1988) 329
Electron diffraction studies of strain in epitaxial bicrystals and multilayers, *Cherns, Kiely and Preston* 24 (1988) 355
Dynamical investigations of electron channeling processes in a stepped crystal surface in reflection electron microscopy, *Wang* 24 (1988) 371
Measurement of strain in silver halide particles by convergent-beam electron diffraction, *Vincent, Preston and King* 24 (1988) 409
Observation of dynamic extinction from high-order Laue zones by convergent beam electron diffraction, *Liu* 25 (1988) 35
Linear imaging and diffraction of an amorphous film, *Marks* 25 (1988) 85
Properties of electron microdiffraction patterns from amorphous materials, *Rodenburg* 25 (1988) 329
Zone-axis critical voltages and large-angle electron diffraction at 200–400 kV, *Steeds* 26 (1988) 1
CBED and CBIM from semiconductors and superconductors, *Humphreys, Eaglesham, Maher and Fraser* 26 (1988) 13
Determination of structure factor phase invariants from non-systematic many-beam effects in convergent-beam patterns, *Høier, Zuo, Marthinsen and Spence* 26 (1988) 25
Measurement of phase invariants in three-beam diffraction, *Bird and James* 26 (1988) 31
Nanometer-area electron diffraction of semiconductor superlattices in transmission electron microscopy, *Tanaka and Mihama* 26 (1988) 37
CBED measurements of lattice mismatch for sub-micron quaternary structures grown on indium phosphide substrates, *Twigg and Chu* 26 (1988) 51
On the use of convergent-beam electron diffraction for identification of antiphase boundaries in GaAs grown on Si, *Lilientai-Weber, Weber, Parechanian-Allen and Washburn* 26 (1988) 59
Investigation of amorphous materials by electron diffraction – the effects of multiple scattering, *Anstis, Liu and Lake* 26 (1988) 65
Quantitative comparison of convergent-beam electron diffraction (CBED) patterns, *Fan* 26 (1988) 71
Electron channeling analysis of aluminium and xenon-implanted aluminium, *Rossouw, Potter and Glanvill* 26 (1988) 87
Microcrystallography using electron channeling: structure factor phase information and crystal site determination, *Taftø and Gjønnes* 26 (1988) 97
Dynamical calculation of RHEED rocking curves for Ag(001) and Pt(111), *Zhao and Tong* 26 (1988) 151
Electron diffraction conditions for surface imaging, *Lehmpfuhl and Uchida* 26 (1988) 177
The observation of surface resonance effects in RHEED patterns, *Peng, Cowley and Yao* 26 (1988) 189
Computer-simulated electron microdiffraction patterns from MgO crystal surfaces, *Pan and Cowley* 26 (1988) 205
Plasmon diffuse scattering in dynamical calculations for RHEED – a method of introducing inelastic scattering in the multislice theory, *Wang and Lu* 26 (1988) 217
Diffuse diffraction spots in RHEED patterns, *Peng and Cowley* 26 (1988) 227
REELS and RHEED characterizations of electron resonance channeling in crystal surfaces, *Wang and Cowley* 26 (1988) 233
Delocalization corrections for electron channeling analysis, *Pennycook* 26 (1988) 239
Electron multiple inelastic scattering in the geometry of RHEED, *Wang* 26 (1988) 321
The characterization of structural variations within a crystal field, *Frank, Chiu and Degn* 26 (1988) 345
Numerical evaluation of lattice parameters from high-order Laue zone lines in convergent-beam electron diffraction disks, *De Blasi, Di Giulio and Manno* 26 (1988) 377
Validity of the kinematical approximation in transmission electron diffraction for the analysis of surface structures, *Tanishiro and Takayanagi* 27 (1989) 1
Electron resonance reflections from perfect crystal surfaces and surfaces with steps, *Wang, Liu, Lu and Cowley* 27 (1989) 101
An alternative study of the reciprocity theorem in electron diffraction, *Qin and Goodman* 27 (1989) 115
Space group symmetry and the location of forbidden reflections due to incoherent multiple scattering from epitaxially oriented paraffins, *Hu, Dorset and Moss* 27 (1989) 161
Fingerprint of oxygen vacancies in Gd superconductors, *Shibahara, Zhang and Marks* 27 (1989) 185
Errors and correction term for HOLZ line simulations, *Lin, Bird and Vincent* 27 (1989) 233
On the dynamical extinction due to a horizontal diamond glide plane, *Ishizuka, Tanaka and Terauchi* 27 (1989) 335
Streaking of reflection high energy electron diffraction spots as a result of refraction

on a curved specimen surface, *Hsu and Lehmpfuhl* 27 (1989) 359
The phase problem, microdiffraction and wavelength-limited resolution – a discussion, *Rodenburg* 27 (1989) 413
Diffraction studies of structure in two Fe multilayers, *Foiles* 29 (1989) 80
Electron diffraction structure analysis of rapidly solidified $(Fe, Ni)_3Al$–C alloys, *Myers and Koch* 30 (1989) 193
Parity tables in convergent-beam diffraction, *Jackson* 30 (1989) 349
Dynamical diffraction of spherical waves of inelastically scattered electron by crystal, *Fan* 30 (1989) 359
Determination of atomic positions using electron nanodiffraction patterns from overlapping regions: Si[110], *Konnert, D'Antonio, Cowley, Higgs and Ou* 30 (1989) 371
Coherent electron microdiffraction from small metal particles, *Pan, Cowley and Barry* 30 (1989) 385

Electron energy loss spectroscopy

Electron energy loss analysis of near-trace-element concentrations of calcium, *Shuman and Somlyo* 21 (1987) 23
EELS quantification of M edges by using oxidic standards, *Hofer* 21 (1987) 63
Surface plasmon excitation for supported metal particles, *Wang and Cowley* 21 (1987) 77
Measurement of local thickness by electron energy-loss spectroscopy, *Egerton and Cheng* 21 (1987) 231
Localization distance of plasmons excited by high-energy electrons, *Cheng* 21 (1987) 291
How to remove multiple scattering from core-excitation spectra. III. Varying the mean free path, *Gibbons, Bradley and Fraundorf* 21 (1987) 305
Determination of manganese oxidation states in solids by electron energy-loss spectroscopy, *Rask, Miner and Buseck* 21 (1987) 321
Excitation of the supported metal particle surface plasmon with external electron beam, *Wang and Cowley* 21 (1987) 335
Generation of surface plasmon excitation of supported metal particles by an external electron beam, *Wang and Cowley* 21 (1987) 347
New examples for near-edge fine structure in electron energy loss spectroscopy, *Hofer and Golob* 21 (1987) 379
Top–bottom effect in energy-selecting transmission electron microscopy, *Reimer and Ross-Messemer* 21 (1987) 385
Zero-loss electron microscopy with the Zeiss EM902, *Trinick and Berriman* 21 (1987) 393
Frontiers of Electron Microscopy in Materials Science, *Eds. Bradley and King* 22 (1987) vii
Local bonding and electronic structure obtained from electron energy loss scattering, *Batson, Kavanagh, Wong and Woodall* 22 (1987) 89
Parallel detection electron spectrometer using quadrupole lenses, *Krivanek, Ahn and Keeney* 22 (1987) 103
CCD-based parallel detection system for electron energy-loss spectroscopy and imaging, *Strauss, Naday, Sherman and Zaluzec* 22 (1987) 117
EELS as a probe of d-band occupancy in magnetic alloys, *Morrison, Brodsky and Zaluzec* 22 (1987) 125
Size and shape dependence of the surface plasmon frequencies for supported metal particle systems, *Wang and Cowley* 23 (1987) 97
An approximate deconvolution for EELS quantification of thicker samples, *Bauer and Scholz* 23 (1987) 109
Electron energy-loss spectroscopy and chemical change, *Egerton, Crozier and Rice* 23 (1987) 305
Spatially resolved electron energy-loss spectroscopy of MoS_2 platelets, *Disko, Treacy, Rice, Chianelli, Gland, Halbert and Ruppert* 23 (1987) 313
High spatial resolution spectroscopy in the elemental microanalysis and imaging of biological systems, *Johnson, Izutsu, Cantino and Wong* 24 (1988) 221
Quantitative electron energy loss spectroscopy in biology, *Leapman and Ornberg* 24 (1988) 251
Operation modes of electron spectroscopic imaging and electron energy-loss spectroscopy in a transmission electron microscope, *Reimer, Fromm and Rennekamp* 24 (1988) 339
Unbiased method for signal estimation in electron energy loss spectroscopy, concentration measurements and detection limits in quantitative microanalysis: methods and programs, *Trebbia* 24 (1988) 399
K, L, M, N, O and P ionization cross-sections for electron energy loss spectroscopy, *Skiff, Carpenter, Lin and Higgs* 25 (1988) 47
EELS quantification of the elements Sr to W by means of M_{45} edges, *Hofer, Golob and Brunegger* 25 (1988) 81
Bright-field detection in a STEM having parallel EELS recording, *McMullan and Berger* 25 (1988) 349
Electron channeling analysis of aluminium and xenon-implanted aluminium, *Rossouw, Potter and Glanvill* 26 (1988) 87
Microcrystallography using electron channeling: structure factor phase information and crystal site determination, *Tafto and Gjønnes* 26 (1988) 97

Localization effects on quantification in axial and planar ALCHEMI, *Spence, Kuwabara and Kim* 26 (1988) 103
Plasmon diffuse scattering in dynamical calculations for RHEED – a method of introducing inelastic scattering in the multislice theory, *Wang and Lu* 26 (1988) 217
REELS and RHEED characterizations of electron resonance channeling in crystal surfaces, *Wang and Cowley* 26 (1988) 233
Delocalization corrections for electron channeling analysis, *Pennycook* 26 (1988) 239
An efficient analytical method for calculating the angular and energy distribution of electrons which have undergone plural scattering in amorphous materials, *Johnson and Isaacson* 26 (1988) 271
Separation of overlapping core edges in electron energy loss spectra by multiple-least-squares fitting, *Leapman and Swyt* 26 (1988) 393
Mass-thickness determination by Bethe-sum-rule normalization of the electron energy-loss spectrum, *Crozier and Egerton* 27 (1989) 9
Adsorption edge imaging of bacterial endospores with synchrotron radiation, *Panessa-Warren, Tortora and Warren* 27 (1989) 151
The dielectric description of inelastic electron scattering, *Schattschneider* 28 (1989) 1
Inner-shell spectroscopy: an atomic view, *Rez* 28 (1989) 16
Cross sections for inelastic electron scattering in solids, *Powell* 28 (1989) 24
High resolution energy-loss spectroscopy, *Batson* 28 (1989) 32
Dielectric theory of localised valence energy loss spectroscopy, *Walls and Howie* 28 (1989) 40
Applications of the near-edge and low-loss fine structure in the analysis of diamond, *Berger, Bruley, Brown and McKenzie* 28 (1989) 43
Coherence effects in plasmon excitation, *Schattschneider and Su* 28 (1989) 47
Quantification of white lines in electron energy loss spectroscopy (EELS), *Manoubi, Tencé and Colliex* 28 (1989) 49
Local structural investigation of surfaces and interfaces by EELFS and EXFAS, *De Crescenzi* 28 (1989) 65
Problems in electron energy loss spectroscopy (summary), *Leapman* 28 (1989) 74
Improved parallel-detection electron-energy-loss spectrometer, *Krivanek* 28 (1989) 118
A quadrupole lens system for use in a parallel recording system for electron energy loss spectroscopy, *Scott and Craven* 28 (1989) 126
Two-dimensional CCD arrays as parallel detectors in electron-energy-loss and X-ray wavelength-dispersive spectroscopy, *Zaluzec and Strauss* 28 (1989) 131
Electron-energy-loss-based spectroscopies: a molecular viewpoint, *Hitchcock* 28 (1989) 165
Optimization of imaging energy filters for high-resolution analytical electron microscopy, *Rose* 28 (1989) 184
Spectroscopy techniques (summary), *Krivanek* 28 (1989) 213
Quantitative analysis of electron-energy-loss spectra, *Egerton* 28 (1989) 215
Filtered dark-field and pure *Z*-contrast: two novel imaging modes in a scanning transmission electron microscope, *Haider* 28 (1989) 240
Chemical mapping and multivariate statistical analysis (prospect), *Bonnet and Hannequin* 28 (1989) 248
Spectrum-image: the next step in EELS digital acquisition and processing, *Jeanguillaume and Colliex* 28 (1989) 252
Imaging and recording of multiple scattering effects by angular-resolved electron energy-loss spectroscopy, *Reimer and Rennekamp* 28 (1989) 258
On the effect of objective lens chromatic aberration on quantitative electron-energy-loss spectroscopy (EELS), *Titchmarsh and Malis* 28 (1989) 277
Spectral processing for EELS, Auger and X-ray spectroscopies (summary), *Shumann* 28 (1989) 288
Medium-voltage EDX and EELS, *Loretto* 28 (1989) 302
Electron spectroscopic imaging of frozen-hydrated sections, *Probst Zellmann and Bauer* 28 (1989) 312
Analysis of small vanadium carbide precipitates using electron energy loss spectroscopy, *Craven, Chuckie, Duckworth and Baker* 28 (1989) 330
Elemental analysis near the single-atom detection level by processing sequences of energy-filtered images, *Mory and Colliex* 28 (1989) 339
Comparison of high spatial resolution in EDX and EELS analysis, *Titchmarsh* 28 (1989) 347
Extraction of electronic structural information on the grain-boundaries of Pd-based polycrystalline specimens with transmission electron energy loss spectroscopy, *Liu* 29 (1989) 44
Energy filtered electron microscopy (EFEM) of overbased reverse micelles, *Martin, Mansot and Hallouis* 30 (1989) 321
Dynamical diffraction of spherical waves of inelastically scattered electron by crystal, *Fan* 30 (1989) 359
A comparison of theoretical and experimental L and M cross sections, *Auerhammer, Rez and Hofer* 30 (1989) 365

Electron probe microanalysis

Radiation effects on X-ray microanalysis of a light element alloy in a medium-voltage electron microscope, *Mansfield, Okamoto, Rehn and Zaluzec* 21 (1987) 13

Optimum defocus for STEM imaging and microanalysis, *Mory, Colliex and Cowley* 21 (1987) 171
Simplification of X-ray absorption correction in thin-sample quantitative microanalysis, *Horita, Sano and Nemoto* 21 (1987) 271
Characterization of model Pt–Rh automotive exhaust control catalysts by EXAFS, STEM and XRD, *Robota, Broach, Sachtler and Bradley* 22 (1987) 149
An experimental X-ray detector efficiency function determined using pure submicron spheres: an approach to quantification, *Kelly* 22 (1987) 175
Uncertainty analysis for low P:B XEDS measurements – variation of aluminum in silicon nitride, *Bonnell and Bischoff* 22 (1987) 191
Field electron emission, the atom probe and scanning tunneling spectroscopy, *Hren and Shedd* 24 (1988) 169
Capabilities and limitations of probe methods for the microanalysis of chemical elements in biology: a brief introduction, *Hall* 24 (1988) 181
Frontiers in electron probe microanalysis: applications to cell physiology, *LeFurgey, Bond and Ingram* 24 (1988) 185
High spatial resolution spectroscopy in the elemental microanalysis and imaging of biological systems, *Johnson, Izutsu, Cantino and Wong* 24 (1988) 221
Quantitative X-ray mapping of biological cryosections, *Fiori, Leapman, Swyt and Andrews* 24 (1988) 237
Proton microscopy and microanalysis – biological applications, *Legge, O'Brien, Kirby and Allan* 24 (1988) 283
Unbiased method for signal estimation in electron energy loss spectroscopy, concentration measurements and detection limits in quantitative microanalysis: methods and programs, *Trebbia* 24 (1988) 399
CLEDX: a stand-alone program for quantitative X-ray analysis using the Cliff–Morimer procedure, *Trebbia* 27 (1989) 343
Problems in X-ray emission spectroscopy (summary), *Chapman* 28 (1989) 76
Two-dimensional CCD arrays as parallel detectors in electron-energy-loss and X-ray wavelength-dispersive spectroscopy, *Zaluzec and Strauss* 28 (1989) 131
Problems associated with EDX detectors from a manufacturer's point of view, *Lowe* 28 (1989) 150
Processing and quantification of X-ray energy-dispersive spectra in the analytical electron microscope, *Zaluzec* 28 (1989) 226
Measurement of grain-boundary segregation by STEM-EDX analysis, *Vatter and Titchmarsh* 28 (1989) 236
Spectral processing for EELS, Auger and X-ray spectroscopies (summary), *Shuman* 28 (1989) 288
Medium-voltage EDX and EELS, *Loretto* 28 (1989) 302
Multivariate statistical analysis of electron probe microanalytical data on cell nuclear constituents, *Quintana and Ollacarizqueta* 28 (1989) 315
Atomic sputtering in the analytical electron microscope, *Bradley and Zaluzec* 28 (1989) 335
Comparison of high spatial resolution in EDX and EELS analysis, *Titchmarsh* 28 (1989) 347

High resolution

Defects in a lamellar polymer by high-resolution electron microscopy, *Giorgio and Kern* 21 (1987) 157
Comment to the images of silicon in ⟨110⟩ orientation, *Izui and Furuno* 21 (1987) 399
Frontiers of electron microscopy in materials science, *Eds. Bradley and King* 22 (1987) vii
Structure, chemistry and diffusion bonding of metal/ceramic interfaces, *Burger, Mader and Rühle* 22 (1987) 1
Microstructural changes in (Mg) PSZ during aging at 1000 °C, *Westmacott, Thorel, Broussard and Laval* 22 (1987) 15
HREM of coherent precipitates in ZrO_2 alloys, *Heuer, Lanteri and Chaim* 22 (1987) 27
High-resolution electron microscopy of interfaces and surfaces, *Gibson, McDonald, Batstone and Phillips* 22 (1987) 35
A high-resolution electron microscopy investigation of some low-angle and twin boundary structures, *Krakow and Smith* 22 (1987) 47
Atomic resolution microscopy of NiO grain boundaries, *Merkle and Smith* 22 (1987) 57
Dynamic edge and surface processes in terbium oxide, *Kang, Eyring and Smith* 22 (1987) 71
Rubidium chromium fluoride structures of the hexagonal tungsten bronze type, *Sharma and Eyring* 22 (1987) 81
Analytical electron microscopy of a sulfur-poisoned palladium catalyst with a dedicated STEM, *Lyman, Stenger and Michael* 22 (1987) 129
High resolution electron microscopy and microanalysis of carbon-supported hydrodesulfurization catalysts, *Allard, Brinen, Daly and Garratt-Reed* 22 (1987) 135
Difference Fourier analysis of "surface features" of bacteriorhodopsin using glucose-embedded and frozen-hydrated purple membrane, *Jaffe and Glaeser* 23 (1987) 17
A new resolution criterion based on spectral signal-to-noise ratios, *Unser, Trus and Steven* 23 (1987) 39
Surface processes observed by high-resolution electron microscopy: beam-induced transformation and reduction in a modified β-PbO_2 crystal, *Kang and Eyring* 23 (1987) 275

High-resolution transmission electron microscopic observations of grain boundaries and surfaces on Cu–Te crystals grown by a solid–solid reaction, *Shiojiri, Isshiki, Okashita, Hirota, Maeda and Sekimoto* 23 (1987) 355
In situ high-resolution electron microscopy reactions in semiconductors, *Sinclair, Parker and Kim* 23 (1987) 383
High-resolution scanning electron microscopy of surface reactions, *Liu and Cowley* 23 (1987) 463
Lower limit of detectability at high spatial resolution of As implanted into Si using the JEOL 200CX in the STM-EDX mode, *Renteln and Ast* 24 (1988) 37
Assessing the information content of HREM images, *Fan and Cowley* 24 (1988) 49
Aspects of high resolution imaging with a scanning ion microprobe, *Levi-Setti, Chabala and Wang* 24 (1988) 97
Spectroscopic information from high resolution images, *Gronsky* 24 (1988) 155
Direct structure determination of the octacyanophthalocyanine–potassium complex crystal by HREM image simulation, *Yanagi, Maeda, Ueda and Ashida* 25 (1988) 1
HREM of thin film $PbMo_6S_8$ superconducting compound, *Vasiliev, Uvarov, Gribeluk, Kiselev, Rickel, Ilyichev and Tsebro* 25 (1988) 23
Super-resolution imaging with near-field scanning optical microscopy (NSOM), *Betzig, Isaacson, Barshatzky, Lewis and Lin* 25 (1988) 155
High-spatial-resolution surface-sensitive electron spectroscopy using a magnetic parallelizer, *Kruit and Venables* 25 (1988) 183
High resolution electron microscopy of composite films of gold and magnexium oxide, *Tanaka, Nagao and Mihama* 25 (1988) 241
Structure determination and correction for distortions in HREM by crystallographic image processing, *Wang, Hovmöller, Kihlborg and Sundberg* 25 (1988) 303
Determination of the symmetry of charge-density-wave modulations in $TaTe_4$ by HREM, *Corbett, Hiltz, Boswell, Bennett and Prodan* 26 (1988) 43
Profile and plan-view imaging of reconstructed surface structures of gold, *Ikarashi, Kobayashi, Koike, Hasegawa and Yagi* 26 (1988) 195
A very simple method for simulating useful high resolution diffraction patterns, *Dorignac and Li* 26 (1988) 249
The contribution of inelastically scattered electrons to high resolution images of (Al,Ga)As/GaAs heterostructures, *Boothroyd and Stobbs* 26 (1988) 361
A theoretical analysis of HREM imaging for ⟨110⟩ tetrahedral semiconductors, *Glaisher, Spargo and Smith* 27 (1989) 19
A systematic analysis of HREM imaging of elemental semiconductors, *Glaisher, Spargo and Smith* 27 (1989) 35
A systematic analysis of HREM imaging of wurtzite semiconductors, *Glaisher, Spargo and Smith* 27 (1989) 117
A systematic analysis of HREM imaging of sphalerite semiconductors, *Glaisher, Spargo and Smith* 27 (1989) 131
Fingerprint of oxygen vacancies in Gd superconductors, *Shibahara, Zhang and Marks* 27 (1989) 185
Charging effect on the HRTEM imaging of small MgO crystals, *Tanji, Masaoka, Ito, Yata and Cowley* 27 (1989) 223
HREM contrast simulations for compound semiconductors – a discussion of appropriate imaging parameters, *Hillebrand and Scheerschmidt* 27 (1989) 375
Survey of electron sources for high-resolution microscopy, *Orloff* 28 (1989) 88
Grain boundary structure and migration, *Smith* 29 (1989) 1
The determination of the structure and composition at interfaces to atomic resolution, *Boothroyd, Baxter, Bithell, Hÿtch, Ross, Sato and Stobbs* 29 (1989) 18
Frontiers of analytical electron microscopy with special reference to cluster and interface problems, *Colliex, Maurice and Ugarte* 29 (1989) 31
High resolution transmission electron microscopy of interphase interfaces in $NiO–ZrO_2(CaO)$, *Dravid, Lyman, Notis and Revcolevschi* 29 (1989) 60
Anomalous slip in a FCC system, *Lee, Robertson and Birnbaum* 29 (1989) 212
High-resolution transmission electron microscopy of precipitate plate growth by diffusional and displacive transformation mechanisms, *Howe and Mahon* 30 (1989) 132
Cross-sectional and high resolution TEM studies of structural phase transitions in MeV-ion-implanted InP crystals, *Xiong, Nieh and Tombrello* 30 (1989) 242
Surface profile images of Te crystals by high-resolution transmission electron microscopy, *Shiojiri, Isshiki and Hirota* 30 (1989) 329

High voltage

Spectroscopic information from high resolution images, *Gronsky* 24 (1988) 155
A very simple method for simulating useful

high resolution diffraction patterns, *Dorignac and Li* 26 (1988) 249
High-precision tilt stage for the high-voltage electron microscope, *Turner, Barnard, Matuszek and See* 26 (1988) 337
Scattering and back-scattering of 1 MeV electrons, *Valle, Genty, Marraud and Pardo* 27 (1989) 67
Specimen limitations in nanocharacterization by TEM/STEM of industrial heterogeneous catalysts: in situ, irradiation damage and micro/macro correlations, *Szymanski and Lynch* 28 (1989) 295
In-situ HVEM studies of the early stages of oxidation of nickel and nickel–chromium alloys, *Marikar, Brodsky, Sowers and Zaluzec* 29 (1989) 247
The coprecipitation of Cr_3P and Cr in Cu, *Witcomb, Dahmen and Westmacott* 30 (1989) 143
In-situ HVEM study of migration of bcc/glass interfaces in $TiCr_2$, induced by 1 MeV krypton irradiation at 80–180 K, *Allen and Rehn* 30 (1989) 188

Image processing, 3D reconstruction

On the inclusion of upper Laue layers in computational methods in high resolution transmission electron microscopy, *Kilaas, O'Keefe and Krishnan* 21 (1987) 47
Similarity measures between images, *Van Heel* 21 (1987) 95
Angular reconstitution: a posteriori assignment of projection directions for 3D reconstruction, *Van Heel* 21 (1987) 111
The simulation of high resolution images of amorphous thin films, *Fan and Cowley* 21 (1987) 125
EMS – a software package for electron diffraction analysis and HREM image simulation in materials science, *Stadelmann* 21 (1987) 131
Actual comparison of experimental and simulated lattice images of the GaAs/AlAs interface, *De Jong, Bender and Coene* 21 (1987) 373
How to obtain a thickness-independent image in a STEM *Jeanguillaume and Tencé* 23 (1987) 67
Simulation of annular dark field STEM images using a modified multislice method, *Kirkland, Loane and Silcox* 23 (1987) 77
A computational assessment of a method for mapping localised displacement fields at boundaries, *Donovan and Stobbs* 23 (1987) 119
Guest editorial, *Eades* 24 (1988) v
Digital image processing of nanometer-size metal particles on amorphous substrates, *Soria, Artal, Bescos and Heinemann* 24 (1988) 19
Assessing the information content of HREM images, *Fan and Cowley* 24 (1988) 49
Concerning "Angular reconstitution: a posteriori assignment of projection directions for 3D reconstruction", *Vainshtein, Goncharov, Ryskin and Vagin* 24 (1988) 61
Addendum to "Angular reconstitution: a posteriori assignment of projection directions of 3D reconstruction", *Van Heel* 24 (1988) 62
Direct structure determination of the octacyanophthalocyanine–potassium complex crystal by HREM image simulation, *Yanagi, Maeda, Ueda and Ashida* 25 (1988) 1
Three-dimensional matching of macromolecular structures obtained from electron microscopy; an application to the 70S and 50S *E. coli* ribosomal particles, *Carazo and Frank* 25 (1988) 13
The use of digital side-band image processing to produce topographic contrast, *Pérez-Ramirez, Gómez, Castaño and José-Yacamán* 25 (1988) 41
A method of image restoration for pseudo-weak-phase objects, *Tang and Li* 25 (1988) 61
Restoration and pictorial representation of scanning tunneling microscope data, *Stoll and Baratoff* 25 (1988) 149
Three-dimensional reconstruction from electron micrographs of disordered specimens. I. Method, *Provencher and Vogel* 25 (1988) 209
Three-dimensional reconstruction from electron micrographs of disordered specimens. II. Implementation and results, *Vogel and Provencher* 25 (1988) 223
Simulations for surface profile imaging, *Lu and Smith* 25 (1988) 265
Contrast transfer for frozen-hydrated specimens: determination from pairs of defocused images, *Toyoshima and Unwin* 25 (1988) 279
Microtomography from limited projections in conventional TEM for 3D reconstruction of an intact cell, *Nelson and Hobbib* 25 (1988) 293
Structure determination and correction for distortions in HREM by crystallographic image processing, *Wang, Hovmöller, Kihlborg and Sundberg* 25 (1988) 303
Determination of mutual orientation of identical particles from their projections by the moments method, *Goncharov and Gelfand* 25 (1988) 317
The reconstruction of helical particles with variable pitch, *Bluemke, Carragher and Josephs* 26 (1988) 255
Image processing of HRTEM images with non-periodic features, *De Jong, Coene and Van Dyck* 27 (1989) 53
Computer image analysis of two-dimensional crystals of beef heart NADH: ubiquinone oxidoreductase fragments. I. Comparison of crystal structures in various negative stains, *Brink, Van Breemen, Keegstra and Van Bruggen* 27 (1989) 79
Computer image analysis of two-dimensional

crystals of beef heart NADH: ubiquinone oxidoreductase fragments. II. Comparison of frozen hydrated and negatively stained specimens, *Brink, Booy and Van Bruggen* 27 (1989) 91
Space group symmetry and the location of forbidden reflections due to incoherent multiple scattering from epitaxially oriented paraffins, *Hu, Dorset and Moss* 27 (1989) 161
Circular harmonic averaging of noisy single-molecule images, *Kunath and SackKongehl* 27 (1989) 171
Spatical rotation alignment of identical particles in the case of (almost) coaxial projections, *Gelfand and Goncharov* 27 (1989) 301
Three-dimensional reconstructions from incomplete data: interpretability of density maps at "atomic" resolution, *Glaeser, Tong and Kim* 27 (1989) 307
Computer image analysis of two-dimensional crystals of beef heart NADH: ubiquinone oxidoreductase fragments. I. Comparison of crystal structures in various negative stains (E), *Brink, Van Breeman, Keegstra and Van Bruggen* 27 (1989) 334
HREM contrast simulations for compound semiconductors – a discussion of appropriate imaging parameters, *Hillebrand and Scheerschmidt* 27 (1989) 375
Three-dimensional effects in multislice image calculations for oblique cells, *Olsson and Kihlborg* 27 (1989) 387
The phase problem, microdiffraction and wavelength-limited resolution – a discussion, *Rodenburg* 27 (1989) 413
EMMPDL – An Electron Microscopy and Microanalysis Public Domain Library, *Zaluzec* 28 (1989) 283
Image processing (summary), *Engel* 28 (1989) 290
Normalization procedures and factorial representations for classification of correlation-aligned images: a comparative study, *Unser, Trus and Steven* 30 (1989) 299
A multi-resolution approach to the 3D reconstruction from an electron microscope tilt series solving the alignment problem without gold particles, *Dengler* 30 (1989) 337
Image processing enhancement of high-resolution TEM micrographs of nanometer-size metal particles, *Artal, Avalos-Borja, Soria, Poppa and Heinemann* 30 (1989) 405
The spectral signal-to-noise ratio resolution criterion: computational efficiency and statistical precision, *Unser, Trus, Frank and Steven* 30 (1989) 429
Three-dimensional reconstruction from two-dimensional projections with unknown orientation, position and projection axis, *Van Dyck* 30 (1989) 435

Imaging

CCD-based parallel detection system for electron energy-loss spectroscopy and imaging, *Strauss, Naday, Sherman and Zaluzec* 22 (1987) 117
Observations of restricted beam-induced specimen motion with small-spot illumination, *Downing* 24 (1988) 387
Lattice imaging of poly-4-methyl-pentene-1 single crystals; use and misuse of Fourier averaging techniques, *Pradére, Revol, Nguyen and Manley* 25 (1988) 69
Linear imaging and diffraction of an amorphous film, *Marks* 25 (1988) 85
Atomic images of silicon? *Hutchison and Waddington* 25 (1988) 93
Super-resolution imaging with near-field scanning optical microscopy (NSOM), *Betzig, Isaacson, Barshatzky, Lewis and Lin* 25 (1988) 155
Application of the "imaging plate" to TEM recording, *Mori, Oikawa, Katoh, Miyahara and Harada* 25 (1988) 195
The use of nonporous oxide particles for imaging the shape and structure of small metal crystallites in heterogeneous catalysts, *Datye and Long* 25 (1988) 203
Simulations for surface profile imaging, *Lu and Smith* 25 (1988) 265
Contrast transfer theory for non-linear imaging, *Bonevich and marks* 26 (1988) 313
Deflection of STEM electrons by dielectric spheres, *Rivacoba and Echenique* 26 (1988) 389
A theoretical analysis of HREM imaging for ⟨110⟩ tetrahedral semiconductors, *Glaisher, Spargo and Smith* 27 (1989) 19
A systematic analysis of HREM imaging of elemental semiconductors, *Glaisher, Spargo and Smith* 27 (1989) 35
A systematic analysis of HREM imaging of wurtzite semiconductors, *Glaisher, Spargo and Smith* 27 (1989) 117
A systematic analysis of HREM imaging of sphalerite semiconductors, *Glaisher, Spargo and Smith* 27 (1989) 131
Absorption edge imaging of bacterial endospores with synchrotron radiation, *Panessa-Warren, Tortora and Warren* 27 (1989) 151
Three-dimensional effects in multislice image calculations for oblique cells, *Olsson and Kihlborg* 27 (1989) 387
The phase problem, microdiffraction and wavelength-limited resolution – a discussion, *Rodenburg* 27 (1989) 413
The imaging of a complete biological structure with the scanning tunneling micro-

scope, *Blackford, Watanabe, Dahn, Jericho, Southam and Beveridge* 27 (1989) 427
Optimization of imaging energy filters for high-resolution analytical electron microscopy, *Rose* 28 (1989) 184
Spectrum-image: the next step in EELS digital acquisition and processing, *Jeanguillaume and Colliex* 28 (1989) 252
Imaging and recording of multiple scattering effects by angular-resolved electron energy-loss spectroscopy, *Reimer and Rennekamp* 28 (1989) 258

Instrumentation

Computer modelling of field emission gun scanning electron microscope columns, *Venables and Cox* 21 (1987) 33
An autofocus method for a TEM, *Koster, Van den Bos and Van der Mast* 21 (1987) 209
Top–bottom effect in energy-selecting transmission electron microscopy, *Reimer and Ross-Messemer* 21 (1987) 385
Zero-loss electron microscopy with the Zeiss EM902, *Trinick and Berriman* 21 (1987) 393
Frontiers of Electron Microscopy in Materials Science, *Eds. Bradley and King* 22 (1987) vii
Parallel detection electron spectrometer using quadrupole lenses, *Krivanek, Ahn and Keeney* 22 (1987) 103
CCD-based parallel detection system for electron energy-loss spectroscopy and imaging, *Strauss, Naday, Sherman and Zaluzec* 22 (1987) 117
High resolution cryo system designed for JEM 100CX electron microscope, *Jeng and Chiu* 23 (1987) 61
Scanning tunneling microscope combined with scanning electron microscope, *Ichinokawa, Miyazaki and Koga* 23 (1987) 115
A compact scanning tunneling microscopy, *Dietz and Hermann* 25 (1988) 107
A scanning tunneling microscope (STM) for biological applications: design and performance, *Guckenberger, Kösslinger, Gatz, Breu, Levai and Baumeister* 25 (1988) 111
SEM/STM combination for STM tip guidance, *Anders, Mück and Heiden* 25 (1988) 123
A scanning tunneling microscope in a side-entry holder for reflection electron microscopy in the Philips EM 400, *Spence* 25 (1988) 165
Miniature-size scanning tunneling microscope with integrated 2-axes heterodyne interferometer and light microscope, *Stemmer, Engel, Häring, Reichelt and Aebi* 25 (1988) 171
High-spatial-resolution surface-sensitive electron spectroscopy using a magnetic parallelizer, *Kruit and Venables* 25 (1988) 183
Growth and current characteristics of stable protrusions on tungsten field ion emitters, *Jousten, Böhringer, Börret and Kalbitzer* 26 (1988) 301
High-precision tilt stage for the high-voltage electron microscope, *Turner, Barnard, Matuszek and See* 26 (1988) 337
Ideal lenses and the Scherzer theorem: a supplement, *Shao and Crewe* 26 (1988) 385
The resolution of photoelectron microscope with UV, X-ray, and synchrotron excitation sources, *Rempfer and Griffith* 27 (1989) 273
An ultra-high-vacuum transmission and scanning electron microscope for crystal growth experiments, *Métois, Nitsche and Heyraud* 27 (1989) 349
The evolution of the analytical electron microscope, *Van der Mast* 28 (1989) 81
Survey of electron sources for high-resolution microscopy, *Orloff* 28 (1989) 88
Magnetic field emission gun with zirconiated emitter: performances at low voltage, *Troyon* 28 (1989) 98
Field emission gun for surface studies, *Morin, Lei He Ning and Pellerin* 28 (1989) 103
A quadrupole lens system for use in a parallel recording system for electron energy loss spectroscopy, *Scott and Craven* 28 (1989) 126
Two-dimensional CCD arrays as parallel detectors in electron-energy-loss and X-ray wavelength-dispersive spectroscopy, *Zaluzec and Strauss* 28 (1989) 131
X-ray detectors and spectrometers, *Lyman, Williams and Goldstein* 28 (1989) 137
Problems associated with EDX detectors from a manufacturer's point of view, *Lowe* 28 (1989) 150
The effect of magnetic fields on incomplete charge collection in Si(Li) X-ray detectors, *Craven, McHardy and Pears* 28 (1989) 157
The wavelength-dispersive spectrometer and its proposed use in the analytical electron microscope, *Goldstein, Lyman and Williams* 28 (1989) 162
A corrected double-deflection electron spectrometer equipped with a parallel recording system, *Haider* 28 (1989) 190
Design of a high-performance Auger spectrometer for the STEM, *Ouyang and Isaacson* 28 (1989) 201
Electron sources (summary), *Troyon* 28 (1989) 207

Methods and techniques

The sharpness of Kikuchi lines and their use in setting the height of the objective aperture in a TEM, *Christenson and Eades* 21 (1987) 101
An autofocus method for a TEM, *Koster, Van den Bos and Van der Mast* 21 (1987) 209
Use of a spot-scan procedure for recording

low-dose micrographs of beam-sensitive specimens, *Bullough and Henderson* 21 (1987) 223
Measurement of local thickness by electron energy-loss spectroscopy, *Egerton and Cheng* 21 (1987) 231
Specimen shift correction in tilting experiments, *Admon* 21 (1987) 297
How to remove multiple scattering from core-excitation spectra. III. Varying the mean free path, *Gibbons, Bradley and Fraundorf* 21 (1987) 305
Nanosecond-exposure electron microscopy of laser-induced phase transformations, *Bostanjoglo, Tornow and Tornow* 21 (1987) 367
Difference Fourier analysis of "surface features" of bacteriorhodopsin using glucose-embedded and frozen-hydrated purple membrane, *Jaffe and Glaeser* 23 (1987) 17
An approximate deconvolution for EELS quantification of thicker samples, *Bauer and Scholz* 23 (1987) 109
A computational assessment of a method for mapping localised displacement fields at boundaries, *Donovan and Stobbs* 23 (1987) 119
When is parallel illumination best for ALCHEMI? *Krishnan* 23 (1987) 199
The use of RF-plasma reaction for in-situ transmission electron microscopy studies, *Poppa and Moorhead* 23 (1987) 271
A method for monitoring the collapse of plastic sections as a function of electron dose, *Luther, Lawrence and Crowther* 24 (1988) 7
Reducing focused ion beam charging effects on insulators by heating; a practical method for TEM specimen preparation of nonconductors, *Lundquist, Alani and Swann* 24 (1988) 27
Scanning electron beam submicron analytical techniques, *Buonaquisti and Russell* 24 (1988) 87
Sputter redeposition as a limit to spatially three-dimensional SIMS microanalysis, *Rüdenauer and Steiger* 24 (1988) 115
Microdiffraction's contribution to microcharacterization, *Eades* 24 (1988) 143
Capabilities and limitations of probe methods for the microanalysis of chemical elements in biology: a brief introduction, *Hall* 24 (1988) 181
Biological microanalysis by secondary ion mass spectrometry: status and prospects, *Burns* 24 (1988) 269
Photoelectron imaging and photoelectron labeling, *Griffith and Rempfer* 24 (1988) 299
X-ray fluorescence with synchrotron radiation, *Jones, Gordon, Hanson, Kwiatek and Pounds* 24 (1988) 313
Operation modes of electron spectroscopic imaging and electron energy-loss spectroscopy in a transmission electron microscope, *Reimer, Fromm and Rennekamp* 24 (1988) 339
Observations of restricted beam-induced specimen motion with small-spot illumination, *Downing* 24 (1988) 387
Unbiased method for signal estimation in electron energy loss spectroscopy, concentration measurements and detection limits in quantitative microanalysis: methods and programs, *Trebbia* 24 (1988) 399
The use of digital side-band image processing to produce topographic contrast, *Pérez-Ramirez, Gómez, Castaño and José-Yacamán* 25 (1988) 41
Lattice imaging of poly-4-methyl-pentene-1 single crystals; use and misuse of Fourier averaging techniques, *Pradére, Revol, Nguyen and Manley* 25 (1988) 69
Technique for jet-thinning aged iron-chromium alloys for TEM, *Kestel* 25 (1988) 89
Technique for preparation of TEM foils from two-phase uranium silicide, *Kestel* 25 (1988) 91
Application of the "imaging plate" to TEM recording, *Mori, Oikawa, Katoh, Miyahara and Harada* 25 (1988) 195
The use of nonporous oxide particles for imaging the shape and structure of small metal crystallites in heterogeneous catalysts, *Datye and Long* 25 (1988) 203
Three-dimensional reconstruction from electron micrographs of disordered specimens. I. Method, *Provencher and Vogel* 25 (1988) 209
Three-dimensional reconstruction from electron micrographs of disordered specimens. II. Implementation and results, *Vogel and Provencher* 25 (1988) 223
Encapsulation, diffusion and DIET in the electron microscope, *Strane, Marks, Luzzi, Buckett, Zhang and Wessels* 25 (1988) 253
Microtomography from limited projections in conventional TEM for 3D reconstruction of an intact cell, *Nelson and Hobbib* 25 (1988) 293
Determination of mutual orientation of identical particles from their projections by the moments method, *Goncharov and Gelfand* 25 (1988) 317
Jet-thinning of $YBa_2Cu_3O_x$ high T_c superconductor and also gold for TEM with a non-acid electrolyte, *Kestel* 25 (1988) 351
Separation of overlapping core edges in electron energy loss spectra by multiple-least-squares fitting, *Leapman and Swyt* 26 (1988) 393
Electrolyte for jet-thinning martensitic steel containing precipitates, *Kestel and Wiggins* 26 (1988) 405
Circular harmonic averaging of noisy single-molecule images, *Kunath and Sack-Kongehl* 27 (1989) 171

Errors and correction term for HOLZ line simulations, *Lin, Bird and Vincent* 27 (1989) 233
Autotuning of a TEM using minimum electron dose, *Koster, De Ruijter, Van den Bos and Van der Mast* 27 (1989) 251
Three-dimensional reconstructions from incomplete data: interpretability of density maps at "atomic" resolution, *Glaeser, Tong and Kim* 27 (1989) 307
A high-yield method for the preparation of cleaved wedge specimens through semiconductor interfaces, *Graham* 27 (1989) 329
HREM contrast simulations for compound semiconductors – a discussion of appropriate imaging parameters, *Hillebrand and Scheerschmidt* 27 (1989) 375
Applications of the near-edge and low-loss fine structure in the analysis of diamond, *Berger, Bruley, Brown and McKenzie* 28 (1989) 43
Current problems in X-ray emission spectroscopy, *Goldstein, Williams and Lyman* 28 (1989) 56
Theoretical analysis of inelastic electron scattering (summary), *Sevely* 28 (1989) 72
Problems in X-ray emission spectroscopy (summary), *Chapman* 28 (1989) 76
Spectroscopy techniques (summary), *Krivanek* 28 (1989) 213
Chemical mapping and multivariate statistical analysis (prospect), *Bonnet and Hannequin* 28 (1989) 248
Spectrum image: the next step in EELS digital acquisition and processing, *Jeanguillaume and Colliex* 28 (1989) 252
From experiment to interpretation: confidence limits, *Trebbia and Manoubi* 28 (1989) 266
Spectral processing for EELS, Auger and X-ray spectroscopies (summary), *Shuman* 28 (1989) 288
Evaluation of errors and accuracy of quantitative measurements (summary), *Craven* 28 (1989) 292
Multivariate statistical analysis of electron probe microanalytical data on cell nuclear constituents, *Quintana and Ollacarizqueta* 28 (1989) 315
Nanolithography using field emission and convential thermionic electron sources, *Devenish, Eaglesham, Maher and Humphreys* 28 (1989) 324
Specimen considerations, materials science (summary), *Titchmarsh* 28 (1989) 352
Specimen considerations, biological science (summary), *Revel* 28 (1989) 355
Definition of ultimate attainable spatial resolution (summary), *Scheinfein* 28 (1989) 359
Comparison with different existing techniques and suggestions for new methods (summary), *Poppa* 28 (1989) 361
Surface electromigration of metal atoms on Si(111) surfaces studied by UHV reflection electron microscopy, *Yamanaka, Yagi and Yasunaga* 29 (1989) 161
Application of transmission electron microscopy to the observation of dislocation emission from crack tips at elevated temperatures, *Clarke and Chiao* 29 (1989) 203
Cross-section specimen preparation technique for nickel alloys and stainless steels, *Seitzman, Wang, Griffin, Komissarov, Kulcinski and Dodd* 29 (1989) 291
In-situ studies of the crystallization of amorphous $CoSi_2$ films, *Smith, Tu and Weiss* 30 (1989) 90
Suppression of the B2 and DO_3 ordering phase transformations in Fe–6.3wt%Si by rapid solidification techniques, *Wittig, Vogt and Frommeyer* 30 (1989) 172
A combined TEM/APFIM approach to the study of phase transformations: phase identification in the Fe–Be system, Burke and Miller 30 (1989) 199
Magnification calibration and the determination of spherical virus diameters using cryo-microscopy, *Olson and Baker* 30 (1989) 281
Normalization procedures and factorial representations for classification of correlation-aligned images: a comparative study, *Unser, Trus and Steven* 30 (1989) 299
Interferometric measurement of axial coma in electron-microscopical images, *Zemlin* 30 (1989) 311
Problems in evaluating the dislocation densities in heavily deformed Cu–Nb composites, *Trybus, Chumbley, Spitzig and Verhoeven* 30 (1989) 315
Determination of atomic positions using electron nanodiffraction patterns from overlapping regions: Si[110], *Konnert, D'Antonio, Cowley, Higgs and Ou* 30 (1989) 371
The spectral signal-to-noise ratio resolution criterion: computational efficiency and statistical precision, *Unser, Trus, Frank and Steven* 30 (1989) 429
On the use of holey grids in electron crystallography, *Toyoshima* 30 (1989) 439

New developments

EMS – a software package for electron diffraction analysis and HREM image simulation in materials science, *Stadelmann* 21 (1987) 131
Top–bottom effect in energy-selecting transmission electron microscopy, *Reimer and Ross-Messemer* 21 (1987) 385
Zero-loss electron microscopy with the Zeiss EM902, *Trinick and Berriman* 21 (1987) 393
Observation of electrostatic fields by electron holography: the case of reverse-biased p–n junctions, *Frabboni, Matteucci and Pozzi* 23 (1987) 29
Scanning tunneling microscope combined with scanning electron microscope, *Ichinokawa, Miyazaki and Koga* 23 (1987) 115

Guest editorial, *Eades* 24 (1988) v
Highly temperature-stable Si_3N_4 perforated grids, *Zandbergen, Pruymboom and Van Tendeloo* 24 (1988) 45
Field electron emission, the atom probe and scanning tunneling spectroscopy, *Hren and Shedd* 24 (1988) 169
Proton microscopy and microanalysis – biological applications, *Legge, O'Brien, Kirby and Allan* 24 (1988) 283
Photoelectron imaging and photoelectron labeling, *Griffith and Rempfer* 24 (1988) 299
Structure and microstructure in $Ba_2YCu_3O_{7-x}$, *Moodie and Whitfield* 24 (1988) 329
A compact scanning tunneling microscope, *Dietz and Herrmann* 25 (1988) 107
A scanning tunneling microscope (STM) for biological applications: design and performance, *Guckenberger, Kösslinger, Gatz, Breu, Levai and Baumeister* 25 (1988) 111
THEED studies of adsorbed xenon on graphite, *Venables, Faisal, Hamichi, Hardiman, Kariotis and Raynerd* 26 (1988) 169
Image processing of HRTEM images with non-periodic features, *De Jong, Coene and Van Dyck* 27 (1989) 53
An alternative study of the reciprocity theorem in electron diffraction, *Qin and Goodman* 27 (1989) 115
Autotuning of a TEM using minimum electron dose, *Koster, De Ruijter, Van den Bos and Van der Mast* 27 (1989) 251
An ultra-high-vacuum transmission and scanning electron microscope for crystal growth experiments, *Métois, Nitsche and Heyraud* 27 (1989) 349
The imaging of a complete biological structure with the scanning tunneling microscope, *Blackford, Watanabe, Dahn, Jericho, Southam and Beveridge* 27 (1989) 427
Dielectric theory of localised valence energy loss spectroscopy, *Walls and Howie* 28 (1989) 40
Current problems in X-ray emission spectroscopy, *Goldstein, Williams and Lyman* 28 (1989) 56
Study and applications of channeled-electron-induced localized X-ray emission, *Glas* 28 (1989) 61
Magnetic field emission gun with zirconiated emitter: performances at low voltage, *Troyon* 28 (1989) 98
Filtered dark-field and pure *Z*-contrast: two novel imaging modes in a scanning transmission electron microscope, *Haider* 28 (1989) 240
Electron spectroscopic imaging of frozen-hydrated sections, *Probst, Zellmann and Bauer* 28 (1989) 312
Comparison with different existing techniques and suggestions for new methods (summary), *Poppa* 28 (1989) 361
TEM and in-situ EM study of the dispersion of MoO_3 on SiO_2, *Datta, Regalbuto and Allen* 29 (1989) 233
In-situ HVEM studies of the early stages of oxidation of nickel and nickel–chromium alloys, *Marikar, Brodsky, Sowers and Zaluzec* 29 (1989) 247
In-situ observations of intrinsic grain boundary structure during thermal cycling, *Lillo, Plichta and Hackney* 29 (1989) 257
In-situ studies of the crystallization of amorphous $CoSi_2$ films, *Smith, Tu and Weiss* 30 (1989) 90
A multislice approach to magnetic electron lens theory, *Pozzi* 30 (1989) 417
Three-dimensional reconstruction from two-dimensional projections with unknown orientation, position and projection axis, *Van Dyck* 30 (1989) 435

Particle optics, experimental

A new resolution criterion based on spectral signal-to-noise ratios, *Unser, Trus and Steven* 23 (1987) 39
Optimization of small electron probes, *Crewe* 23 (1987) 159
Chromatic aberration effects in small electron probes, *Shao and Crewe* 23 (1987) 169
Realistic comparison of gun lens designs, *Barth* 24 (1988) 1
Consideration of electron optics for transmission, reflection and emission geometries (summary), *Jouffrey* 28 (1989) 205
Interferometric measurement of axial coma in electron-microscopical images, *Zemlin* 30 (1989) 311

Particle optics, theory

Computer modelling of field emission gun scanning electron microscope columns, *Venables and Cox* 21 (1987) 33
Realistic comparison of gun lens designs, *Barth* 24 (1988) 1
Contrast transfer theory for non-linear imaging, *Bonevich and Marks* 26 (1988) 313
Ideal lenses and the Scherzer theorem: a supplement, *Shao and Crewe* 26 (1988) 385
Consideration of electron optics for transmission, reflection and emission geometries (summary), *Jouffrey* 28 (1989) 205
A multislice approach to magnetic electron lens theory, *Pozzi* 30 (1989) 417

Radiation damage and contamination

Use of spot-scan procedure for recording low-dose micrographs of beam-sensitive specimens, *Bullough and Henderson* 21 (1987) 223
Specimen movement in electron-irradiated

paraffin crystals – a model for initial beam damage, *Dorset and Zemlin* 21 (1987) 263
Electron-irradiation-induced flattening of negatively stained 2D protein crystals, *Jésior and Wade* 21 (1987) 313
EDS investigation of solute–precipitate interactions in ferritic steels under irradiation, *Muroga, Yoshida and Kitajima* 22 (1987) 281
Some electron-induced changes at surfaces, *Lichtman* 23 (1987) 291
The electron-beam-induced reduction of transition metal oxide surfaces to metallic lower oxides, *Smith, McCartney and Bursill* 23 (1987) 299
The effect of dose rate on imaging aromatic organic crystals, *Fryer* 23 (1987) 321
Chemical changes in electron-beam-irradiated polymers, *Vesely and Finch* 23 (1987) 329
Electron-beam sensitivity in organic specimens, *Hobbs* 23 (1987) 339
Damage effects of high energy electrons on metals, *King, Benedek, Merkle and Meshii* 23 (1987) 345
Electron beam sensitivity of zeolite L, *Treacy and Newsam* 23 (1987) 411
Damage of zeolite Y in the TEM and its effect on TEM images, *Csencsits and Gronsky* 23 (1987) 421
Structural transformation and chemical reduction of $Pr_{24}O_{44}$ induced by the electron beam during microscopical examination, *Schweda, Eyring and Smith* 23 (1987) 443
Electron-induced decomposition of rubidium chromium fluoride, *Sharma, Barry and Eyring* 23 (1987) 453
A method for monitoring the collapse of plastic sections as a function of electron dose, *Luther, Lawrence and Crowther* 24 (1988) 7
Encapsulation, diffusion and DIET in the electron microscope, *Strane, Marks, Luzzi, Buckett, Zhang and Wessels* 25 (1988) 253
Substrate properties affect the mass loss rate in collodion at liquid helium temperature, *Lamvik, Davilla and Klatt* 27 (1989) 241
Specimen limitations in nanocharacterization by TEM/STEM of industrial heterogeneous catalysts: in situ, irradiation damage and micro/macro correlations, *Szymanski and Lynch* 28 (1989) 295
Limits of detection sensitivity due to electron beam radiation damage, *Isaacson* 28 (1989) 320
Radiation effects (summary), *Humphreys* 28 (1989) 357
Electron irradiation damage in oxides, *Buckett, Strane, Luzzi, Zhang, Wessels and Marks* 29 (1989) 217
Decomposition of refractory carbides in the analytical electron microscope, *Medlin, Thomas and Howitt* 29 (1989) 228
Radiation damage and copper distribution in 14 MeV copper-ion-implanted nickel – TEM and AEM analyses in cross-section, *Wang, Dodd and Kulcinski* 29 (1989) 284
Disordering and phase decomposition of Ni_2Al_3 under low-temperature electron irradiation, *Kenik and Nastasi* 30 (1989) 181
In-situ HVEM study of migration of bcc/glass interfaces in $TiCr_2$, induced by 1 MeV krypton irradiation at 80–180 K, *Allen and Rehn* 30 (1989) 188
Electron beam damage in high T_c superconductor materials, *Rickards, Oliver and José-Yacamán* 30 (1989) 425

Reflection electron microscopy, high-energy electron diffraction

Dynamical investigations of electron channeling processes in a stepped crystal surface in reflection electron microscopy, *Wang* 24 (1988) 371
A scanning tunneling microscope in a side-entry holder for reflection electron microscopy in the Philips EM 400, *Spence* 25 (1988) 165
Anomalous reflected images of objects on crystal surfaces in reflection electron microscopy, *Kambe* 25 (1988) 259
Determination of surface step distributions on Ge using RHEED, *Cohen and Pukite* 26 (1988) 143
Dynamical calculation of RHEED rocking curves for Ag(001) and (Pt(111), *Zhao and Tong* 26 (1988) 151
Surface resonance effects and beam convergence in REM, *Peng and Cowley* 26 (1988) 161
Electron diffraction conditions for surface imaging, *Lehmpfuhl and Uchida* 26 (1988) 177
Scattering and back-scattering of 1 MeV electrons, *Valle, Gently, Marraud and Pardo* 27 (1989) 67
Electron resonance reflections from perfect crystal surfaces and surfaces with steps, *Wang, Liu, Lu and Cowley* 27 (1989) 101
Streaking of reflection high energy electron diffraction spots as a result of refraction on a curved specimen surface, *Hsu and Lehmpfuhl* 27 (1989) 359
REM observation of electron-beam-induced reactions on GaAs(110) surface, *Peng* 27 (1989) 423
Surface steps imaged by secondary electrons, *Milne* 27 (1989) 433
Profile imaging of surfaces and surface reactions, *Smith, Glaisher, Lu and McCartney* 29 (1989) 123
Reflection electron imaging of free surfaces and surface/dislocation interactions, *Peng, Cowley and Hsu* 29 (1989) 135
Surface electromigration of metal atoms on Si(111) surfaces studied by UHV reflection electron microscopy, *Yamanaka, Yagi and Yasunaga* 29 (1989) 161
Thermal diffuse scattering and REM image-contrast preservation, *Peng and Cowley* 29 (1989) 168

Elastic and inelastic scattering effects in reflection electron microscopy, *Bleloch, Howie, Milne and Walls* 29 (1989) 175
Dynamical theory of spot splitting in RHEED, *Marks and Ma* 29 (1989) 183
RHEED detection of near surface crystalline phases on a $Pd_{80}Si_{20}$ metallic glass surface with adsorbates present, *Tlomak, Hannus and Brower, Jr.* 29 (1989) 192

Scanning electron microscopy

Scanning tunneling microscope combined with scanning electron microscope, *Ichinokawa, Miyazaki and Koga* 23 (1987) 115
Line resolution in the sub-ten-nanometer range in SAM, *Cazaux, Chazelas, Charasse and Hirtz* 25 (1988) 31
SEM/STM combination for STM tip guidance, *Anders, Mück and Heiden* 25 (1988) 123
Scanning tunneling and scanning electron microscopy investigations of nonuniform surfaces, *Wiesendanger, Anselmetti, Eng, Heinzelmann, Hidber, Rosenthaler, Staufer, Güntherodt, Düggelin and Guggenheim* 25 (1988) 129
An ultra-high-vacuum transmission and scanning electron microscope for crystal growth experiments, *Métois, Nitsche and Heyraud* 27 (1989) 349
Surface steps imaged by secondary electrons, *Milne* 27 (1989) 433
Secondary electron spectroscopy in a dedicated scanning transmission electron microscope, *Bleloch* 29 (1989) 147
Topographic imaging of GaAs-microstructured samples by STM and SEM, *Gómez-Rodríguez, Vázquez, Bartolomé, Baró, Grambow and Heitmann* 30 (1989) 355

Scanning transmission electron microscopy

Channeling effects from impurity atoms in the high-angle annular detector of the STEM, *Treacy, Gibson, Short and Rice* 26 (1988) 133
Deflection of STEM electrons by dielectric spheres, *Rivacoba and Echenique* 26 (1988) 389
Visibility and stability of a 12-tungsten atom complex in the scanning transmission electron microscope, *Monson, Wall and Hainfeld* 21 (1987) 147
Optimum defocus for STEM imaging and microanalysis, *Mory, Colliex and Cowley* 21 (1987) 171
Experimental determination of the probe profile in a dedicated scanning transmission electron microscope, *Berger, Imeson and Milne* 21 (1987) 293
Characterization of model Pt–Rh automotive exhaust control catalysts by EXAFS, STEM and XRD, *Robota, Broach, Sachtler and Bradley* 22 (1987) 149
STEM studies of ruthenium dispersed on a pillared clay Fischer–Tropsch catalyst, *Rightor and Pinnavaia* 22 (1987) 159
How to obtain a thickness-independent image in a STEM, *Jeanguillaume and Tencé* 23 (1987) 67
Study of freshly deposited metallic particles on MgO crystal surfaces by scanning reflection electron microscopy, *Ou and Cowley* 23 (1987) 263
Lower limit of detectability at high spatial resolution of As implanted into Si using the JEOL 200 CX in the STEM–EDX mode, *Renteln and Ast* 24 (1988) 37
Bright-field detection in a STEM having parallel EELS recording, *McMullan and Berger* 25 (1988) 349
Observations of surface-channeling phenomena with a STEM instrument, *Cowley* 27 (1989) 319
Imaging of metal-coated biological samples by scanning tunneling microscopy, *Garcia, Keller, Panitz, Bear and Bustamante* 27 (1989) 367
Parallel recording for an electron spectrometer on a scanning transmission electron microscope, *Berger and McMullan* 28 (1989) 122
Design of a high-performance Auger spectrometer for the STEM, *Ouyang and Isaacson* 28 (1989) 201
Measurement of grain-boundary segregation by STEM–EDX analysis, *Vatter and Titchmarsh* 28 (1989) 236
Filtered dark-field and pure *Z*-contrast: two novel imaging modes in a scanning transmission electron microscope, *Haider* 28 (1989) 240
Specimen limitations in nanocharacterization by TEM/STEM of industrial heterogeneous catalysts: in situ, irradiation damage and micro/macro correlations, *Szymanski and Lynch* 28 (1989) 295
Secondary electron spectroscopy in a dedicated scanning transmission electron microscope, *Bleloch* 29 (1989) 147
Z-contrast STEM for materials science, *Pennycook* 30 (1989) 58

Scanning tunneling microscopy

Scanning tunneling microscopy, preface, *Baumeister* 25 (1988) 99
Tip microscopy – top microscopy? An introduction, *Baumeister* 25 (1988) 103
A compact scanning tunneling microscope, *Dietz and Herrmann* 25 (1988) 107
A scanning tunneling microscope (STM) for biological applications: design and performance, *Guckenberger, Kösslinger, Gatz, Breu, Levai and Baumeister* 25 (1988) 111

SEM/STM combination for STM tip guidance, *Anders, Mück and Heiden* 25 (1988) 123
Scanning tunneling and scanning electron microscopy investigations of nonuniform surfaces, *Wiesendanger, Anselmetti, Eng, Heinzelmann, Hidber, Rosenthaler, Staufer, Güntherodt, Düggelin and Guggenheim* 25 (1988) 129
Scanning tunneling spectroscopy on Si, *Neddermeyer and Tosch* 25 (1988) 135
Restoration and pictorial representation of scanning tunneling microscope data, *Stoll and Baratoff* 25 (1988) 149
A scanning tunneling microscope in a side-entry holder for reflection electron microscopy in the Philips EM 400, *Spence* 25 (1988) 165
Miniature-size scanning tunneling microscope with integrated 2-axes heterodyne interferometer and light microscope, *Stemmer, Engel, Häring, Reichelt and Aebi* 25 (1988) 171
The imaging of a complete biological structure with the scanning tunneling microscope, *Blackford, Watanabe, Dahn, Jericho, Southam and Beveridge* 27 (1989) 427
Scanning tunneling and transmission electron microscopy on identical areas of biological specimens, *Stemmer, Hefti, Aebi and Engel* 30 (1989) 263
Topographic imaging of GaAs-microstructured samples by STM and SEM, *Gómez-Rodríguez, Vázquez, Bartolomé, Baró, Grambow and Heitmann* 30 (1989) 355

Specimen preparation

A simple staining method for chromatin in electron microscopy compatible with serial sectioning, *Esquivel, Rovira, Echeverría and Vásquez-Nin* 21 (1987) 103
Electron-irradiation-induced flattening of negatively stained 2D protein crystals, *Jésior and Wade* 21 (1987) 313
TEM specimen heating during ion beam thinning: microstructural instability, *Kim and Carpenter* 21 (1987) 327
The preparation of transmission electron microscope specimens from compound semiconductors by ion milling, *Chew and Cullis* 23 (1987) 175
Highly temperature-stable Si_3N_4 perforated grids, *Zandbergen, Pruymboom and Van Tendeloo* 24 (1988) 45
Technique for jet-thinning aged iron-chromium alloys for TEM, *Kestel* 25 (1988) 89
Technique for preparation of TEM foils from two-phase uranium silicide, *Kestel* 25 (1988) 91
Encapsulation, diffusion and DIET in the electron microscope, *Strane, Marks, Luzzi, Buckett, Zhang and Wessels* 25 (1988) 253
Jet-thinning of $YBa_2Cu_3O_x$ high T_c superconductor and also gold for TEM with a non-acid electrolyte, *Kessel* 25 (1988) 351
A preparation technique for TEM cross-sections of test structures with reduced feature size, *Garulli, Armigliato and Finetti* 26 (1988) 295
Preparation of narrow amorphous ribbon specimens for transmission electron microscopy, *Cabanillas and Versaci* 26 (1988) 335
Computer image analysis of two-dimensional crystals of beef heart NADH: ubiquinone oxidoreductase fragments. I. Comparison of crystal structures in various negative stains, *Brink, Van Breemen, Keegstra and Van Bruggen* 27 (1989) 79
Computer image analysis of two-dimensional crystals of beef heart NADH: ubiquinone oxidoreductase fragments. II. Comparison of frozen hydrated and negatively stained specimens, *Brink, Booy and Van Bruggen* 27 (1989) 91
Effects of certain electron-microscope stains on phospholipid monolayers, *Gorwyn and Barnes* 27 (1989) 113
A high-yield method for the preparation of cleaved wedge specimens through semiconductor interfaces, *Graham* 27 (1989) 329
Computer image analysis of two-dimensional crystals of beef heart NADH: ubiquinone oxidoreductase fragments. I. Comparison of crystal structures in various negative stains (E), *Brink, Van Breemen, Keegstra and Van Bruggen* 27 (1989) 334
Specimen considerations, materials science (summary), *Titchmarsh* 28 (1989) 352
Specimen considerations, biological science (summary), *Revel* 28 (1989) 355
Chemical compatibility of CVD and plasma-assisted CVD Si_3N_4 and SiO_2 coatings for thermal protection of carbon–carbon composite, *Kowbel, Chen and Yenchang* 29 (1989) 71
On the preparation of cross-sectional TEM samples using lithographic processing and reactive ion-etching, *Wetzel, Jost, Rishton, Fryer, Kwietniak, Klaus, Bucchignano, Hu and Brown, Jr.* 29 (1989) 110
Cross-section specimen preparation technique for nickel alloys and stainless steels, *Seitzman, Wang, Griffin, Komissarov, Kulcinski and Dodd* 29 (1989) 291
Reaction couples of ceramic thin films prepared by CVD, *Susnitzky, Summerfelt and Carter* 30 (1989) 249

Spectrometers, auxiliary apparatus

Scanning tunneling spectroscopy on Si, *Neddermeyer and Tosch* 25 (1988) 135
High-spatial-resolution surface-sensitive elec-

ton spectroscopy using a magnetic parallelizer, *Kruit and Venables* 25 (1988) 183
Improved parallel-detection electron-energy-loss spectrometer, *Krivanek* 28 (1989) 118
Parallel recording for an electron spectrometer on a scanning transmission electron microscope, *Berger and McMullan* 28 (1989) 122
X-ray detectors and spectrometers, *Lyman, Williams and Goldstein* 28 (1989) 137
A corrected double-deflection electron spectrometer equipped with a parallel recording system, *Haider* 28 (1989) 190

Surfaces, clusters, interfaces and particles

Surface plasmon excitation for supported metal particles, *Wang and Cowley* 21 (1987) 77
Observation of dynamic extinction due to a glide plane perpendicular to an incident beam by convergent-beam electron diffraction, *Tanaka, Terauchi and Sekii* 21 (1987) 245
Excitation of the supported metal particle surface plasmon with external electron beam, *Wang and Cowley* 21 (1987) 335
Generation of surface plasmon excitation of supported metal particles by an external electron beam, *Wang and Cowley* 21 (1987) 347
Actual comparison of experimental and simulated lattice images of the GaAs/AlAs interface, *De Jong, Bender and Coene* 21 (1987) 373
Frontiers of Electron Microscopy in Materials Science, *Eds. Bradley and King* 22 (1987) vii
Structure, chemistry and diffusion bonding of metal/ceramic interfaces, *Burger, Mader and Rühle* 22 (1987) 1
Microstructural changes in (Mg) PSZ during aging at 1000 °C, *Westmacott, Thorel, Broussard and Laval* 22 (1987) 15
HREM of coherent precipitates in ZrO_2 alloys, *Heuer, Lanteri and Chaim* 22 (1987) 27
High-resolution electron microscopy of interfaces and surfaces, *Gibson, McDonald, Batstone and Phillips* 22 (1987) 35
A high-resolution electron microscopy investigation of some low-angle and twin boundary structures, *Krakow and Smith* 22 (1987) 47
Atomic resolution microscopy on NiO grain boundaries, *Merkle and Smith* 22 (1987) 57
Dynamic edge and surface processes in terbium oxide, *Kang, Eyring and Smith* 22 (1987) 71
Analytical electron microscopy of a sulfur-poisoned palladium catalyst with a dedicated STEM, *Lyman, Stenger and Michael* 22 (1987) 129
High resolution electron microscopy and microanalysis of carbon-supported hydrodesulfurization catalysts, *Allard, Brinen, Daly and Garratt-Reed* 22 (1987) 135
STEM studies of ruthenium dispersed on a pillared clay Fischer–Tropsch catalyst, *Rightor and Pinnavaia* 22 (1987) 159
An experimental X-ray detector efficiency function determined using pure submicron spheres: an approach to quantification, *Kelly* 22 (1987) 175
Influence of segregation on the diffraction effects from homophase interfaces, *Vitek* 22 (1987) 197
SREM of MgO crystal surface structure and in-situ-deposited metallic particles on MgO surface, *Ou and Cowley* 22 (1987) 207
Determining the 3D lattice parameters of nanometer-sized single crystals from images, *Fraundorf* 22 (1987) 225
Weak-beam α-fringe electron microscopy of interface structures, *Miyazawa and Ishida* 22 (1987) 231
Scale structures during oxidation and sulphidation of nickel and a nickel–chromium alloy, *Gjonnes and Andersen* 22 (1987) 289
Electron microscopy study of sputtered NbN films, *Ho, Kampwirth, Gray, Capone, Chumbley and Meshii* 22 (1987) 297
Observation of double contours of monoatomic steps on single crystal surfaces in reflection electron microscopy, *Uchida and Lehmpfuhl* 23 (1987) 53
Electron resonance channeling on crystal surfaces in reflection high energy electron diffraction geometry, *Wang, Lu and Cowley* 23 (1987) 205
Surface facetting and polarity of alumina, *Bursill, Lin and Smith* 23 (1987) 223
Foreword to Chemical Reactions and the Electron Microscope, ASU Workshop, January 1987, *Eds. Smith and Barry* 23 (1987) 259
Study of freshly deposited metallic particles on MgO crystal surfaces by scanning reflection electron microscopy, *Ou and Cowley* 23 (1987) 263
Surface processes observed by high-resolution electron microscopy: beam-induced transformation and reduction in a modified β-PbO_2 crystal, *Kang and Eyring* 23 (1987) 275
Some electron-induced changes at surfaces, *Lichtman* 23 (1987) 291
High-resolution transmission electron microscopic observations of grain boundaries and surfaces on Cu–Te crystals grown by a solid–solid reaction, *Shiojiri, Isshiki, Okashita, Hirota, Maeda and Sekimoto* 23 (1987) 355
Microstructural evolution during the decomposition of $Mg(OH)_2$, *Dahmen, Kim and Searcy* 23 (1987) 365
High-resolution scanning electron microscopy of surface reactions, *Liu and Cowley* 23 (1987) 463
Digital image processing of nanometer-size

metal particles on amorphous substrates, *Soria, Artal, Bescos and Heinemann* 24 (1988) 19
Electron diffraction studies of strain in epitaxial bicrystals and multilayers, *Cherns, Kiely and Preston* 24 (1988) 355
Dynamical investigations of electron channeling processes in a stepped crystal surface in reflection electron microscopy, *Wang* 24 (1988) 371
Measurement of strain in silver halide particles by convergent-beam electron diffraction, *Vincent, Preston and King* 24 (1988) 409
Line resolution in the sub-ten-nanometer range in SAM, *Cazaux, Chazelas, Charasse and Hirtz* 25 (1988) 31
Scanning tunneling and scanning electron microscopy investigations of nonuniform surfaces, *Wiesendanger, Anselmetti, Eng, Heinzelmann, Hidber, Rosenthaler, Staufer, Güntherodt, Düggelin and Guggenheim* 25 (1988) 129
The use of nonporous oxide particles for imaging the shape and structure of small metal crystallites in heterogeneous catalysts, *Datye and Long* 25 (1988) 203
Anomalous reflected images of objects on crystal surfaces in reflection electron microscopy, *Kambe* 25 (1988) 259
Simulations for surface profile imaging, *Lu and Smith* 25 (1988) 265
On the use of convergent-beam electron diffraction for identification of antiphase boundaries in GaAs grown on Si, *Lilientai-Weber, Weber, Parechian-Allen and Washburn* 26 (1988) 59
Determination of surface step distribution on Ge using RHEED, *Cohen and Pukite* 26 (1988) 143
Surface resonance effects and beam convergence in REM, *Peng and Cowley* 26 (1988) 161
THEED studies of adsorbed xenon on graphite, *Venables, Faisal, Hamichi, Hardiman, Kariotis and Raynerd* 26 (1988) 169
Electron diffraction conditions for surface imaging, *Lehmpfuhl and Uchida* 26 (1988) 177
Profile and plan-view imaging of reconstructed surface structures of gold, *Ikarashi, Kobayashi, Koike, Hasegawa and Yagi* 26 (1988) 195
Computer-simulated electron microdiffraction patterns from MgO crystal surfaces, *Pan and Cowley* 26 (1988) 205
Deflection of STEM electrons by dielectric spheres, *Rivacoba and Echenique* 26 (1988) 389
Validity of the kinematical approximation in transmission electron diffraction for the analysis of surface structures, *Tanishiro and Takayanagi* 27 (1989) 1
Electron resonance reflections from perfect crystal surfaces and surfaces with steps, *Wang, Liu, Lu and Cowley* 27 (1989) 101
A systematic analysis of HREM imaging of wurtzite semiconductors, *Glaisher, Spargo and Smith* 27 (1989) 117
A systematic analysis of HREM imaging of sphalerite semiconductors, *Glaisher, Spargo and Smith* 27 (1989) 131
Charging effect on the HRTEM imaging of small MgO crystals, *Tanji, Masaoka, Ito, Yada and Cowley* 27 (1989) 223
Observations of surface-channelling phenomena with a STEM instrument, *Cowley* 27 (1989) 319
A high-yield method for the preparation of cleaved wedge specimens through semiconductor interface, *Graham* 27 (1989) 329
Streaking of reflection high energy electron diffraction spots as a result of refraction on a curved specimen surface, *Hsu and Lehmpfuhl* 27 (1989) 359
REM observation of electron-beam-induced reactions on GaAs(110) surface, *Peng* 27 (1989) 423
Surface steps imaged by secondary electrons, *Milne* 27 (1989) 433
Local structural investigations of surfaces and interfaces by EELFS and EXFAS techniques, *De Crescenzi* 28 (1989) 65
Field emission gun for surface studies, *Morin, Lei He Ning and Pellerin* 28 (1989) 103
Measurement of grain-boundary segregation by STEM–EDX analysis, *Vatter and Titchmarsh* 28 (1989) 236
Specimen limitations in nanocharacterization by TEM/STEM of industrial heterogeneous catalysts: in situ, irradiation damage and micro/macro correlations, *Szymanski and Lynch* 28 (1989) 295
Analysis of small vanadium carbide precipitates using electron energy loss spectroscopy, *Craven, Chuckie, Duckworth and Baker* 28 (1989) 330
Grain boundary structure and migration, *Smith* 29 (1989) 1
Effect of thermal and stress exposure on grain boundaries of silicon nitride, *Bradley and Karasek* 29 (1989) 9
The determination of the structure and composition at interfaces to atomic resolution, *Boothroyd, Baxter, Bithell, Hÿtch, Ross, Sato and Stobbs* 29 (1989) 18
Frontiers of analytical electron microscopy with special reference to cluster and interface problems, *Colliex, Maurice and Ugarte* 29 (1989) 31
Extraction of electronic structural information on the grain-boundaries of Pd-based polycrystalline specimens with transmission electron energy loss spectroscopy, *Liu* 29 (1989) 44
Microstructural studies of sputter-deposited TiN ceramic films, *Pelton, Dabrowski,*

Lehman, Ernsberger, Miller and Mansfield 29 (1989) 50
High resolution transmission electron microscopy of interphase interfaces in $NiO–ZrO_2(CaO)$, *Dravid, Lyman, Notis and Revcolevschi* 29 (1989) 60
Diffraction studies of structure in two Fe multilayers, *Foiles* 29 (1989) 80
Material transport mechanisms during the diffusion bonding of niobium to Al_2O_3, *Burger and Rühle* 29 (1989) 88
Interfacial studies of carbon–carbon composites, *Kowbel, Chen and Yenchang* 29 (1989) 98
Profile imaging of surfaces and surface reactions, *Smith, Glaisher, Lu and McCartney* 29 (1989) 123
Reflection electron imaging of free surfaces and surface/dislocation interactions, *Peng, Cowley and Hsu* 29 (1989) 135
RHEED detection of near surface crystalline phases on a $Pd_{80}Si_{20}$ metallic glass surface with adsorbates present, *Tlomak, Hannus and Brower, Jr.* 29 (1989) 192
In-situ observations of intrinsic grain boundary structure during thermal cycling, Lillo, *Plichta and Hackney* 29 (1989) 257
Characterization of ceramic films and interfaces by electron microscopic and spectroscopic techniques, *Erdemir and Cheng* 29 (1989) 266
TEM studies of line defects in interfaces, *Pond* 30 (1989) 1
Multiple structures in a $\Sigma = 27$ related boundary in germanium, *Smith, Elgat, Krakow, Levi and Carter* 30 (1989) 8
The hierarchy of grain boundary structures, *Ishida, Ichinose and Inomata* 30 (1989) 13
Inversion boundaries in GaAs grown in Si, *Liliental-Weber, O'Keefe and Washburn* 30 (1989) 20
Determination of the lattice translation across antiphase boundaries, *Rasmussen, Cho, Susnitzky and Carter* 30 (1989) 27
Dislocation reaction in a $\Sigma = 41$ related asymmetrical tilt boundary in gold, *Norden and Smith* 30 (1989) 33
Studies of interfacial segregation in the analytical electron microscope: a brief review, *Williams and Romig, Jr.* 30 (1989) 38
Contrast effects at grooved interfaces, *Rasmussen, Simpson, Kilaas and Carter* 30 (1989) 52
Dynamic observations of the transfer of slip across a grain boundary, *Robertson, Lee, Rozenak, Bond and Birnbaum* 30 (1989) 70
The use of the transmission electron microscope in analyzing slip propagation across interfaces, *Clark, Wise, Shen and Wagoner* 30 (1989) 76
Observations of dislocation interactions with recrystallized grain boundaries, *Price* 30 (1989) 97
Atomic growth mechanisms for lamellar structures, *Fonda and Shiflet* 30 (1989) 116
High-resolution transmission electron microscopy of precipitate plate growth by diffusional and displacive transformation mechanisms, *Howe and Mahon* 30 (1989) 132
The coprecipitation of Cr_3P and Cr in Cu, *Witcomb, Dahmen and Westmacott* 30 (1989) 143
The movement of the spinel–NiO interface in thin films, *Summerfelt and Carter* 30 (1989) 150
Formation of Cr and Cr_2Nb precipitates in rapidly solidified Cu–Cr–Nb ribbon, *Ellis and Michal* 30 (1989) 210
TEM studies of transformation interfaces and substructures in some copper-based shape-memory alloys, *Perkins, Adachi, Wu and Yamashita* 30 (1989) 217
Vanadia-induced transformations in yttria-stabilized zirconia, *Susnitzky, Hertl and Carter* 30 (1989) 233
The growth of hematite by oxidation of iron-bearing olivine, *McKernan and Carter* 30 (1989) 256
Surface profile images of Te crystals by high-resolution transmission electron microscopy, *Shiojiri, Isshiki and Hirota* 30 (1989) 329
Coherent electron microdiffraction from small metal particles, *Pan, Cowley and Barry* 30 (1989) 385
Transmission electron microscopy of the interaction of dislocations and mechanical twinning during subgrain formation in $Ti_{50}Ni_{47}Fe_3$, *Moberly* 30 (1989) 395
Image processing enhancement of high-resolution TEM micrographs of nanometer-size metal particles, *Artal, Avalos-Borja, Soria, Poppa and Heinemann* 30 (1989) 405

Thick specimens

Stardust in the TEM, *Fraundorf, Fraundorf, Bernatowicz, Lewis and Tang* 27 (1989) 401

Abstracts / Announcements / Book reviews / Comments / Editorials / Reports / Miscellaneous

Special announcement, Study Course in Sicily 21 (1987) 179
Abstracts of papers presented at The Netherlands Society of Electron Microscopy Annual Meeting, Wageningen, December 1986, *Eds. Berendsen and Pieters* 21 (1987) 181
Issues, proceedings and other business, *Hawkes* 21 (1987) 299
Abstracts of papers presented at the 21st Scientific Meeting of The Israel Society of Electron Microscopy, Haifa, May 1987, *Ed. Kessel* 23 (1987) 229
Guest editorial, *Eades* 24 (1988) v
Special announcement 24 (1988) 63

Selected abstracts of papers presented at the 40th Annual Meeting of the Scandinavian Society for Electron Microscopy SCANDEM-87, Bergen, June 1987 24 (1988) 65
Frontiers of submicron spectroscopy and biological microanalysis, a special biological symposium honoring T.A. Hall, Foreword, *Hren and Ingram, editors* 24 (1988) 83
Abstracts of papers presented at the Annual Conference of The Netherlands Society of Electron Microscopy, December 1987, *Woldringh, editor* 24 (1988) 421
Special issues, edited volumes and much else, *Hawkes* 26 (1988) 327
Special announcement 26 (1988) 409
Selected Abstracts from the 40th Annual Meeting of The Scandinavian Society for Electron Microscopy, SCANDEM-88, Aarhus, June 1988 26 (1988) 411
Abstracts of papers presented at the 22nd Scientific Meeting of The Israel Society of Electron Microscopy, Tel-Aviv, June 1988, *Nir, editor* 26 (1988) 423
Abstracts of papers presented at the Annual Conference on The Netherlands Society of Electron Microscopy, Kerkrade, 30 November – 2 December 1988 27 (1989) 193
Foreword to Electron-beam-induced spectroscopies with high spatial resolution, *Colliex and Isaacson* 28 (1989) ix
EMMPDL – An Electron Microscopy and Microanalysis Public Domain Library, *Zaluzec* 28 (1989) 283
Summary and conclusions, *Isaacson and Colliex* 28 (1989) 363
Book review, *Schiske* 30 (1989) 445
Report of a meeting, *Boekestein* 30 (1989) 448
